Subject: IAEA Director General's Assessment of U.S.-Saudi 123 Civil Nuclear Cooperation Agreement Safeguards
Importance: Normal
Sensitivity: None

John,

On behalf of our client, the Royal Embassy of Saudi Arabia, we wanted to share recent remarks made by International Atomic Energy Agency ("IAEA") Director General Rafael Grossi commenting on the *United States-Saudi Arabia Agreement for Cooperation Concerning Peaceful Uses of Nuclear Energy* (the "123 Agreement"). In July 2026, the U.S. and Kingdom of Saudi Arabia announced the signing of a 30-year peaceful nuclear cooperation agreement pursuant to Section 123 of the Atomic Energy Act. The 123 Agreement includes a Bilateral Safeguards Agreement ("BSA").

At a November 18, 2026, press conference following an IAEA Board of Governors meeting, Grossi said that the BSA is "fully aligned with the legal framework that we have at the IAEA" and is a "very satisfactory outcome."

Earlier, in his opening statement to the Board of Governors, Director General Grossi stated:

> "I welcome the open, transparent approach and engagement of both Governments with Member States and the Secretariat on this matter, in particular as this Bilateral Safeguards Agreement will facilitate the provision of broader safeguards relevant information and access to facilities and activities which are subject to the Agreement and enables the Agency to implement additional safeguards and verification measures in Saudi Arabia."

The BSA contains safeguards and verification measures, which, upon the 123 Agreement's implementation, would be monitored by the IAEA. The IAEA is an autonomous intergovernmental organization within the United Nations system that promotes the safe, secure, and peaceful use of nuclear technology. In September, Grossi said the BSA's provisions are "very, very similar to those that you may find in an Additional Protocol."

As your office considers a potential vote in connection with the 123 Agreement during the lame duck session, please let us know if you have any questions or would like additional information.

Best,
Ari
