## NAU TECH NAWOOTECH CO.

### Introduction

NAWOOTECH provides total Automotive parts for Korea vehicle brand with good quality and competitive pricing all manufacturing in KOREA such as TRANSMISSIONS, ENGINES, POWER STEERING SYSTEMS, SUSPENSION and OIL SEALS to Passenger cars.

Especially Transmission parts, Oil seals and For Repair kits are our popular items and the customer have good satisfaction base on outstanding engineering knowledge and good service.

### Products

#### \*Transmission Repair kit

We provides high-quality overhaul and transfer repair kits for Korean brand vehicles with professional repairing technology.

#### \*Total Transmission Parts

Provides Transmission parts for Korea motor brand to good quality and various type of transmission parts in Korea.

#### \*Oil seals

Various type of oil seals as good quality and competitive pricing.

**SEASCO**

**Introduction**

We, SEASCO, have been a leading exporter for Autoparts & Battery from Korea during past 23 years.

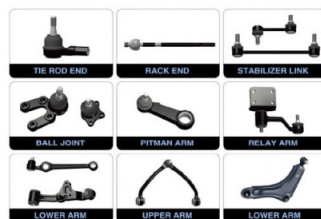

We are specialized in supplying premium quality of batteries to all over the world with excellent reputation and supplying all kinds of auto spare parts, high quality lubricants, having the most experienced supplier chain in Korea, as well as even in other sourcing countries. Also we are have made a contract with Samyung Metal as a representative for the overseas market. And we opened our sales shop in Janghanpyeong which is one of the biggest auto spare parts markets in Korea.

**Products**

**<Steering & Suspension Parts>**

DuMax branded steering & suspension parts which are produced by SAMYUNG, one of the most well-known suspension parts manufacturers in Korea.

We work closely with SAMYOUNG METAL IND as their representative, marketing their products in the overseas market.

**<High Quality Lubricant Oil>**

DuMax branded lubricant, which is produced by a Korean blending factory. Our high-quality lubricant will meet customer satisfaction.

**WOOSHIN INDUSTRIES CO., LTD**

Booth No.  
A667

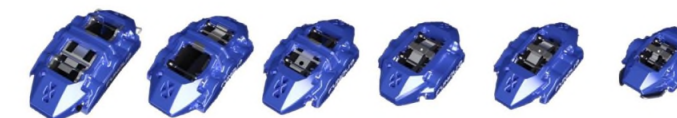

**Introduction**

Wooshin Industries is the manufacturer and exporter of brake caliper since 1992. Based upon our accumulated technology and lots of experience, Wooshin is specialized in manufacturing calipers and manufactures a variety of braking devices for automobile and industrial uses in accordance with customers needs.

We can supply the parts not only for Aftermarket but also for OE market. We have developed and possessed more than 1000 kinds of calipers. The present status of the developed calipers-based on the local classification is as below.

**Products**

We produce the brake calipers with new castings and every new component parts. And we have aluminum casting line so that we can produce aluminum calipers with the castings casted in house.

**MIRAE INDUSTRIAL****Introduction**

Hello, We are MIRAE INDUSTRY.  
A manufacturer of automotive maintenance equipment with over 30 years of business in Republic of Korea.

Our representative products include auto-moving electric table lifts, frame lifts, etc.

And we are supplying Kia's electric vehicle assembly plant and the Korean military and the largest bus company in Korea.

**Products****Auto moving electric table lift****1. Use and Features**

It was released for the engine and trans missoin attachment of internal combustion locomotives, With the recent surge in demand for eco-friendly vehicles (electric vehicles, hydrogen electric vehicles, and hybrid vehicles), it can be used together for battery attachment and detachment.

**2. Originality of technology**

It is manufactured with specifications suitable for automobile maintenance, and for the first time in Korea, a shock absorber device and a controller were attached to the table lift to make it easy to move on the bumper and successful in development and commercialization.

**3. Specifications**

Top plate size	800 * 1500 mm
Height	Max 1800 / Min 450 mm
Maximum capacity	1.0 Ton
Max Speed	2.6 km/h

**DUKSHIN CORP., LTD****Introduction**

Since the establishment in 1988, Dukshin Corp., Ltd. has been a leading manufacturer of liquid transfer pumps. We specialize in supplying reliable and high-quality products through rigorous research, development, and strict quality control. With decades of expertise and a commitment to excellence, Dukshin Corp., Ltd. is your trusted partner for competitive pumping solutions.

**NAOTECH CO., LTD****Introduction****[NAOTECH CO., LTD.]**

Our company was established in October 10, 2000 with the purpose of selling special coatings that are applied in various fields. Ranging from auto parts, roller OA equipment, optical devices, and acoustic devices. Made to the requirements of the customers product. Also, we have made coating tailored specially for the customer's need to produce the Optimum solution for the customer.

**[TECHNOLOGICAL SUPPORT]**

If you do not understand the coating process or don't know what to choose, we provide a hands-on technological support.

We will help you with choose the right kind of coating according to your

needs, and answering any questions you might have.

**[VALFINE]**

VALFINE is trademark for our various lubricants product applications. VALFINE is the development of functional coatings, which is based in urethane resin, fluorine resin with additive substances such as PTFE, Graphite, and MoS2.

**[QUALITY CONTROL]**

In order to insure the stability and the reliability of the coating, we conduct a harsh quality control.

We also have ISO 9001, 2008 certification and are still trying hard to improve the quality of our product.

**Products****[LUBRICANT]**

Dispersing in binder solid lubricant will give the reduction of rubbing index, smooth operation of the substrates and avoid wear or tear abrasion.

The base resin for this is Molybdenum disulfide (MoS2), PTFE (Polytetrafluoroethylene), Graphite and Boron, which allows individual properties.

The applications for this are automobile parts, OA machine, Camera parts, electrics parts, constructions, etc.

**[WATER-REPELLENT NON-ADHESIVE GRADES]**

Grants water repellency, oil repellency to non-adhesive products and are mainly used for automotive parts,

OA equipment, constructions, home appliances, etc.

**[HIGH FRICTION GRADE]**

Provides high lubricity resistance to the surface of the conductor film, which prevents slipping and is mainly used OA related equipment, automotive parts.

**[ELECTRIC CONTROL CONDUCTIVITY]**

Provides electrical resistance to the conductor, which is mainly used for OA equipment.

**KOR.E INTERNATIONAL CO., LTD****Introduction**

KOR.E International Co., Ltd was founded in 1989. We are official distributors for the Korean OE manufacturers and have our plant to provide over 1,000 models of condensers and its genuine parts. We have focused on trading and manufacturing condenser, auto A/C products, auto spare parts, machinery and raw material sales along with providing the best quality and service possible in the automotive parts industry. With our producing management system, we are able to offer both our manufactured goods and also those of the OE manufactures in Korea at excellent pricing, and with the knowledge to back it up.

**Products**

Product Name : **Condenser**  
 Parallel Flow (PF) and Microtube  
 All condensers certified by ISO 9001 / TS  
 16949 / ISO 14001  
 Customizing over 1000 condenser models  
 Premium and custom packing available

Product Name : **A/C Thermal Product Line**  
 Full Korean Range  
 100% OE genuine products  
 First to market with new applications  
 Custom re-packing available

Product Name : **Auto spare parts**  
 Application of Korean auto spare parts :  
 Wiper, Rack, Shock absorber, Horn, Joint,  
 Break pad, Fuel pump, Arm, Water pump,  
 Alternator etc.

## ILSHIN INDUSTRIAL CO., LTD (S-OIL)

## Introduction

S-OIL, established in 1976 has grown into one of the most competitive oil refiners in the Asia-Pacific region by establishing profitability-oriented management strategies and nurturing dynamic and progressive spirit in the management. We operate the oil refinery facility with the capacity of 669,000 barrels per day (BPD) and other facilities that can produce petrochemicals and lube base oil in the Onsan Refinery in Ulsan. We are strengthening our status as a leader in protecting customers and the environment by producing and supplying the best quality oil products.

## Products

- \* Automotive oil (Passenger car, Commercial vehicle, Motorcycle, ATF/MTF/Axle, LPG/CNG)
  - \* Industrial oil (Hydraulic, Gear, Turbine/Compressor, Process, Transformer, Grease)
  - \* Marine oil (Cylinder oil, Trunk Piston oil, System oil)
  - \* S-OIL controls its' products quality from crude oil. S-OIL sources crude oil from very limited account to keep products' quality more stable than competitors.
  - \* S-OIL has own base oil from Group I to Group III, which means that finished products are manufactured with S-OIL's own base oil.
- In terms of Group III base oil, S-OIL is covering 20~30% of global demand. S-OIL's base oil plant is 2nd largest in the world.
- \* S-OIL only uses additives from 4 global major additive company.
  - \* S-OIL's blending plant is operated with Global Major company in Korea, and we have technology agreement with Japanese lubricants company, which means that our facilities meet European, Japanese and Korean standard.
  - \* Also, S-OIL has strong relationship with Car makers.

## KIMBLADE CO., LTD

## Introduction

## Kimblade: Revolutionizing Wiper Tech

Kimblade was founded to innovate the century-old wiper design. Our unique four-bar-link-structured blade overcomes traditional limitations, has secured international patents, and has topped global crowdfunding platforms. The blade's enhancement ensures optimal vision and safety. Through meticulous R&D, in-house precision manufacturing, and sourcing top-quality frames, we've produced a versatile, economical wiper suitable for various vehicles. Kimblade embodies Korea's commitment to road safety and visionary engineering.

## Products

KIMBLADE revolutionizes wiper technology with its Silicone Wiper Blades featuring a water-repellent coating release mechanism, ensuring optimal visibility in all weather conditions. Crafted from high-grade silicone, these blades offer superior durability, quieter operation, and longer lifespan. With our unique design, KIMBLADE provides premium performance for modern vehicles, making them the perfect choice for discerning drivers.

**MIRAL J&P CO., LTD****Introduction**

As one of Korea's major auto spare parts suppliers, Miral J&P was established in 2005 by high quality professionals with more than 10 to 20 years of experiences in this field.

We are supplying all different kinds of auto parts such as Engine, Brake, Body, Suspension, Electrical, Air-conditioning Parts and etc. All item classes from Genuine(Original), OEM and Replacement(NG, Rebuilt) are available with us.

You will soon come to know that our responses are fast and systematic, and our services are executed in professional ways. Happy Business and Happy Life are with us. We are ready to share them with you. Just get it.

**Products**

All auto parts classes are available from Genuine(Original), OEM, NG and Rebuilt

1. **Genuine** : Genuine or Original Product. Products supplied by Car Makers, packed in genuine car maker's brand packages
2. **OEM** : Products that car maker's OE supplier s distribute directly to the market under their own brand, not car maker's brand. These products are same as the original but the package and brand name are different
3. **Non Genuine** : Products that Non-OE but quality manufacturers produce and put in the after-market. Some of these products have their own brand and some do not
4. **REBUILT** : Used products that are repaired and re-conditioned

**YBS / YOOCHANG HI-TECH CO., LTD****Introduction**

We, YBS / YOOCHANG HI-TECH CO., LTD., design & manufacture Fuel Pump for auto mobiles. The scope of supply can be widely arranged for Korean cars & major brands in EU & Japan as well. Any special requests for fuel pump design & producing also available upon requests.

**Products**

Fuel Pump is a device that supplies fuel at a pressure of about 3 BAR from an automobile's fuel tank to a carburetor or injector (or high-pressure fuel pump)

We, YBS, provide various types of Fuel Pump such as EFI type, Complete Module Assembly, Contact type, TR type, Mechanical types.

- \* Fuel Pump & Fuel Pump Module
- For passenger car of major brands
- For Agricultural machinery
- For general Industrial machine
- Custom Fuel Pump as per special design request

shryu5510@naver.com**CS AUTO CO., LTD****Introduction**

CS Auto manufactures electrical engine parts specializing in starter motors and alternators. We only deal with high quality materials, parts, and products.

Our management goal is to produce the highest quality goods, offer them at the most reasonable price, and deliver them to you in a timely and efficient manner.

We will always do our utmost to ensure our management goal is achieved.

**Products****※ Alternator characteristics, application fields, and technology**

A device that generates alternating current (AC) electricity using the rotational energy of the engine and charges the battery

- 1) Supplies power to the automobile electrical system
- 2) Charges the battery after starting the engine
- 3) Supports the operation of electrical components such as headlights, wipers, and air conditioners

**※ Starter characteristics, application fields, and technology**

A powerful direct current (DC) motor that provides the powerful torque required to start the engine

- Starts the engine by rotating the engine crankshaft
- Does not operate after the engine starts

**※ Quality and price competitiveness compared to competing products of starter and alternator**Quality and reliability

- Establishment of strict quality management system and acquisition of certification
- Pursuit of customer satisfaction through high durability and stability
- Quality proven in the global market

Price competitiveness

- Reasonable pricing and improvement of production efficiency
- Securing competitiveness compared to low-cost overseas products
- Providing customized solutions

**DONGHAE ETC****Introduction**

1. Owned Manufacturing plant and Assembly plant for AC Compressor in South Korea.
2. Specialized in EV&HEV Compressor rebuild and OE development.
3. Use Function, reliability air conditioning system inspection facility.
4. Variable type and Fixed type compressors are manufactured at assembled in South Korea.

**Products**

1. Variable type AC Compressor
2. Fixed type AC Compressor

3. EV & HEV AC Compressor

## JUNE HEUNG FILTER CO., LTD

### Introduction

June Heung Filter quality automotive filters in a tradition of technical expertise. Since its founding in 1978, JUNE HEUNG FILTER CO., LTD (JHF) has been producing and manufacturing high. We manufacture oil filter, air filter, cabin filter and fuel filter for domestic cars made from Japan, Korea, Europe and North America. As a leading automotive filter brand, we are exporting JHF products to more than 30 countries. The quality Control System of JHF is a critical element that is applied in all processes from R&D and design to production. As ISO-9001 and TS 16949 certified, we have increased competitiveness and technical capabilities. Also, to ensure high quality, we use the best grade of raw materials and complete all production sections at our factory and we handle overall productions and distributions of auto parts to offer improved convenience and currently we export brake pad, lining and belt under JHF.

### Products

OIL FILTER (SPIN-ON), OIL FILTER (ECO), AIR FILTER, FUEL FILTER, CABIN FILTER

The device responsible for removing impurities contained within engine oil helps decrease engine malfunctions and prevents internal wear, thereby extending the lifespan of the vehicle.

Internal combustion engines in automobiles cannot endure with dirty engine oil for long, hence it is essential to maintain cleanliness using an oil filter to safeguard the engine. To prevent degradation of the filter's functionality due to impurities such as dust, sand particles, and metal abrasion generated during engine operation, it is advisable to adhere to the recommended oil change interval and replace both the oil and filter.

Junheung Filter employs highly efficient and durable filter media, ensuring excellent filtration performance and prolonged lifespan of the filter.

## MOTORTOOL

### Introduction

MOTORTOOL, founded in 1999, is the company that specializes in manufacturing automotive repair & maintenance equipment, diagnostic tester, common rail test bench, DPF cleaning machine and technical training in diagnosis & state of the art diesel technology.

### Products

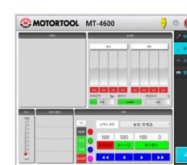

#### MT-4600: CRDI Test bench

Automatic measurement and analysis by Flow sensor

#### Automatic recognition of injector

> Display real time resistance values and check states of a solenoid injector

#### Pump IMV test (Pressure waveform display)

#### Bosch piezo actuator test

> Function to check whether there is a poor start or shut off while driving

#### Coil magnetic force test

> Function to check whether the remanufacturing is possible due to coil aging and to measure the magnetic force value.

#### Short circuit test

> Function to check 4 injectors for short circuit or other circuit problem at the same time

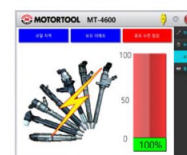

#### Knocking test

> Test to identify shaking or knocking of the car while driving  
Able to identify the cause of knocking when idling and accelerating

#### Pattern test

> Injection balance test by each injector per a cylinder to make a car quiet.

#### High pressure test

> Test to identify the cause of shut off while high speed driving for Bosch and Denso piezo injectors

**KIMCHA****Introduction**

Make the Import Easy and Happen More Frequently! KIMCHA KIMCHA, established in 2019, is a dynamic startup leading the Korean automotive parts industry. We bridge the gap between overseas buyers and Korean suppliers through innovative online platforms, making it easier for international markets to access high-quality Korean auto parts. Our Mission is to simplify the import process and foster frequent transactions between global buyers

and Korean automotive manufacturers. We aim to remove barriers in sourcing parts, ensuring a seamless experience for our clients.

Our Services : We offer several key online services:

- **Korean Auto Parts Web Portal:** A comprehensive resource launched in 2019, providing detailed information on OEM parts, aftermarket components, and specialized accessories.
- **Supplier and Buyer Integration:** We connect overseas buyers with trusted Korean suppliers, facilitating smooth transactions.
- **Customizable Ordering and Logistics:** We offer flexible ordering options, including mixed orders and small-quantity purchases, as well as AIR shipment solutions.

**Products**

Our Products KIMCHA offers a diverse range of automotive parts, catering to the needs of different markets around the world. Our product lineup includes:

- **Smart Keys:** High-quality smart keys for various vehicle models, known for their reliability and advanced technology.
- **Ignition Coils:** Essential components for vehicle ignition systems, offering durability and high performance.
- **Oil Control Valves:** Precision-engineered valves that ensure optimal engine performance and efficiency.
- **Engine Sensors & Auto transmission related parts:** A range of sensors crucial for monitoring and regulating various engine functions, ensuring smooth operation.
- **Shock Absorbers:** High-performance shock absorbers designed to provide a comfortable and safe driving experience.
- **Fuel Pumps:** Reliable fuel pumps that meet the stringent demands of modern vehicles.
- **Side Foot Steps:** Stylish and functional side foot steps, enhancing vehicle aesthetics and ease of access.

**PARTS-MALL CORPORATION****Introduction**

Established in 1999, Parts-Mall has become Korea's leading auto parts supplier, with a global network spanning South Africa, Moscow, and Shanghai. Known for its extensive product range and exceptional quality, Parts-Mall provides OE and OEM applications, as well as its own brand, PMC. Our goal is to be a comprehensive solutions provider for the automotive industry, offering top-quality parts and outstanding service to ensure customer satisfaction. Committed to industry leadership, Parts-Mall is dedicated to global growth through a focus on quality, innovation, and efficient operations, including fast delivery worldwide.

**Products**

Parts-Mall's core products include filters, gasket kits, shock absorbers, brake pads, pistons, and pin sets for Korean, European, and Japanese vehicles, ensuring comprehensive coverage and reliability. Our private brands include PMC, proudly made in Korea, which offers high-quality filters, brake pads, and suspension parts at competitive prices. We also offer PMC-ESSENCE, manufactured in China and Taiwan, providing affordable and dependable alternatives for engine bearings, valves, piston rings, body parts, and lamps for Korean vehicles. Parts-Mall partners with top manufacturers, maintains rigorous quality control, and continuously invests in innovation, including co-producing cabin filters with a leading Korean manufacturer.

K-INTERNATIONAL INC. has been a trusted leader in the global automotive parts industry since 2005. We supply high-quality automotive parts to renowned Korean and Japanese automobile companies worldwide.

**Products**

**Stabilizer link** – Our stabilizer links are made under precision. Strict tests are done to all links to ensure they meet the highest standards. We apply force until breakage occurs, always meeting or surpassing OE standards.

**Tie rod end** – Our tie rod ends are designed to ensure safe, reliable driving, built to last with durable materials that can withstand every day wear and tear.

**Ball joint** – Our ball joints are applied perfectly, with crack-tested ball-pins for flawless performance. A special rubber cover protects internal components while high-spec grease reduces friction, enabling smooth operation in any condition.

**Rack end** – Our rack ends are built to completely meet OE specifications, built for maximum durability and reliability. Also, high intensity pull and stress tests make excellent capacity which ends up providing vital support to tie rod ends

**Shock absorber** – Our Shock Absorber undergoes rigorous testing to ensure optimal performance and durability. Under the strict management you'll enjoy a controlled and balance ride, free from the discomfort of excessive spring motion.

**YM TECH CO., LTD****Introduction**

YM Tech is specialized in DC high voltage relay. It designs, manufactures and supplies the core components for the electrical and electronics industries. Founded in 1998, YM Tech has been developing and supplying DC Relay, Latch Relay, EV Relay and Military Purpose Relay, etc. As technology-intensive Inno-Biz company, YM Tech has acquired various quality certifications such as ISO9001 and UL. Furthermore, it received 2006 Innovation Award, 2011 Excellent SME Biz Award and acquired TS16949 auto parts plant certification in 2015, thereby demonstrating its advanced technology.

EV Relay is used in electric vehicles. To switch the battery power to safely, EV Relay is very important electrical component in electric vehicles. Moreover, it ensures the safety of high-voltage lithium batteries such as battery energy storage systems and charging station for electric vehicles, etc. YM Tech's EV relay received CCC certification for the first time in the world and acquired IEC CB, CE, UL, FCC etc., thereby complying with all international standards.

YM Tech has reduced the size and weight of DC switching devices used for electric vehicles, charging systems, energy saving devices, solar pow

**Products****Ceramic Relay**

1. Ceramic Sealed Relay
2. Securing Contact Reliability and Stability of Contact Resistance through Hydrogen Gas Insulation
3. Excellent insulation and withstand voltage
4. Excellent Electrical Lifespan and No Arc Extinguishing Direction (No Polarity)
5. Ensure Excellent Short-Circuit Durability Performance

**OSUNG TECHNICS CO., LTD****Introduction**

OSUNGTECHNICS is an enterprise specializing in the Suspension & Steering parts of Automobile. The main products manufactured by our company are Stabilizer link, Ball Joint, Tie Rod End, Rack End and Control Arm. We are liberal with investment and research especially on the technical quality and durability of products and also on the material development. To become a leading company in the industry of automobile components, OSUNGTECHNICS is constantly improving and making efforts with introduction of automation machineries and quality improvement systems. In the endless competition, OSUNGTECHNICS will pledge itself to carry out original intention and to gain trust and confidence from our customers with the idea of 'the company keeping the basic principles.

**Products**

Osung Technics' Stabilizer Links are specialized produ for the aftermarket, produced in-house. These produc with quality surpassing that of OE parts, have been chosen by numerous overseas buyers. They are highly regarded in the market for their stability, timely supply, and competitive pricing. All components are Made in Korea, showcasing excellent technical expertise, and they are supplied to fit a wide range of vehicles and models. In particular, Osung Technics is enhancing its brand value in the Middle Eastern market too.

**NEWAUTO PRECISION CO., LTD****Introduction**

NEWAUTO PRECISION is the only manufacturer in Korea which handles die-casting, machining, assembling, packing, testing and shipping on-site without any out-sourcing.

Therefore, our products are very competitive in terms of quality and price.

In addition, we have variou quality certificate such as IATF 16949, ISO 9001, ISO 14001 and etc.

Thanks to our continuous efforts, we have exported our products to more than 50 countries around the world and impressed our clients.

We promise that we will keep making our best efforts for product development and technology improvement and satisfying our valuable clients with high quality and competitive price.

**Products**

**Water Pump** : A water pump is mounted on the cylinder block and fastened by the bolts. It circulates cooling water by getting the driving force of crankshaft through the water pump drive belt or gear. In case an engine, the heart of automobile, is heated, the coolant is being circulated to cool it down. In case the engine temperature keeps rising and even reaches up to a certain level, engine parts could malfunction. The circulation of cooling water could also be needed to operate a heater which makes water pump a significant part in an automobile.

**Oil Pump** : In an engine, parts need to move smoothly all the time. For this, oil reduces friction, and it is moved by an oil pump. An oil pump sucks oil from an oil pan and sends it to components. In general, it is installed in an oil pan. Since all moving parts should be lubricated, oil smooths the functioning of engine parts. An oil pump circulates carbon residues inside an engine as well as oil. They are being filtered through an oil filter and can be reused.

  - Automotive Bulbs
  - Home/Shop/Industrial Lighting
  - Highway Service Area Business
- Own brand for Automotive Bulbs "EAGLEYE", "EAGLITE"
- Export to over 50 countries
  - USA, Europe, Japan, Russia, Middle East, Africa, South America

**Products**

- **Halogen bulbs for automobile**
  - Our Halogen bulbs have managed to keep the highest standard of quality under the quality system of ISO/TS 16949 and ISO 14001.

We've been supplying our products to the South Korean car makers Hyundai, Kia motors, and Renault Samsung Motors; to the world's famous 1st-tier lamp makers, Koito, AL, Hella, Valeo, and Ichiko; and to the world-class auto part OEMs Bosch, Stanley, etc.

- **LED BULBS FOR AUTOMOBILE**
  - 1:1 same size as Halogen Bulbs
  - +200% brighter than Halogen Bulbs
  - Upto 6500k Brighter

**YULCHON KOREA, MEXICO, POLAND****Introduction**

YULCHON is a specialized manufacturer of Cold-Drawn Carbon Steel Tubes (DOM Tube) for steering columns, rack and pinion steering gears, propeller shafts, gas cylinders, gas springs, hydraulic cylinders, shock absorbers, bush in the automotive industry and shaped tubes in the furniture and construction industry. Since its founding in 1986, we have made steady efforts in technology development and product quality improvement. As a result, we currently export products to USA, Mexico, Australia, Europe, South-East Asia, China, Japan, the Middle East and are expanding to markets in the rest of the world. We established YULCHON MEXICO in 2014 for customers in the U.S and Latin American markets and YULCHON POLAND in 2023 for European market to help them minimize on costs resulting in consistent quality, on-time delivery and competitive prices. Now you can take advantage of our geographic position in the world. We always try to meet customers' expectations and our aim is to be the best DOM manufacturer in the world.

## DAIWON OPTICAL CO., LTD

### Introduction

Established in 1988, DAIWONOPTICAL CO., LTD. has been a leading manufacturer specializing in a wide range of cutting-edge lenses, designed specifically for Automotive, Security, Home Automation, and Machine Vision Cameras.

Specially, Daiwon is now focusing on Automotive field and we provide various lenses to camera module companies for advanced driver assistance systems (ADAS), driver monitoring system (DMS) and surround view system (SVS).

With our accumulated expertise, continuous technical advancements, quality-focused management, and proactive sales development, Daiwon has earned a strong global reputation for precision optical technology.

Daiwon has extensive experience operating to global standards of excellence in these fast-paced industries. From design and consulting to production, we provide innovative, high-quality lenses that exceed customer expectations.

Certified with ISO 9001:14001 and IATF 16949, our rapid response services and advanced technology are supported by over a decade of engineering craftsmanship.

DAIWON continues to strive to become the most trusted company in the industry, leading innovation with top-tier service and cutting-edge technology.

### Products

Camera Lenses For Auto Vision

Daiwon Optical is a leading developer and manufacturer of automotive lenses for advanced vision systems used in safety applications.

The core technology of Daiwon Optical is with its own patented lens designs. These sophisticated designs are integral to its market-leading surround view systems (SVS) and the development of Advanced Driver Assistance systems (ADAS).

A key aspect of Daiwon's competitive edge is its ability to develop automotive lenses that meet even the most stringent OEM requirements.

Daiwon is also expanding its product range from narrow-angle to wide-angle lenses, and from standard to ultra-small designs, to better serve the needs of advanced driver assistance systems (ADAS), driver monitoring system (DMS) and surround view system (SVS).

## KOREA AUTOPARTS CO., LTD

### Introduction

Korea Auto Parts Co., Ltd (KAP) was established in 1991 by Mr. PARK Chang Kyu. 33 years of experience, we are dealing with all kinds of Korean spare parts. Our export volume is ranked within top3 for over than 15 years among Korean car parts traders. We are doing our business based on sincerity and honesty. That is why more than 60 countries and 300 buyers are consistently looking for us. And we are always open to our customers 7days, 24 hours. Our intranet system makes it possible. WWW.KAPCO.BIZ. So, please don't hesitate to contact us.

### Products

- 1. KAP [OUR OWN BRAND]**
  - At the moment we have more than 14 thousand items of spare parts under our own brand KAP.
- 2. GM-DAEWOO/CHEVROLET**
  - We have official dealership
- 3. HYUNDAI & KIA (MOBIS) LOCAL/EXPORT APPLICATION**
- 4. SSANGYONG**
  - We have official dealership
- 5. RENAULT SAMSUNG LOCAL/EXPORT APPLICATION**
- 6. PROMINENT KOREA OE PRODUCTS (OEM BRAND)**

## JND HYDRAULICS CO., LTD

### Introduction

Founded in 2003, JND Hydraulics has established itself as a leading manufacturer and distributor of hydraulic power packs, based in Korea. With decades of specialized experience in the hydraulic industry, we have earned the trust of our customers through

the reliability of our products and our deep technical expertise.

Our commitment to quality and innovation has allowed us to not only dominate the domestic market but also expand significantly into international markets. This growth has been driven by our ability to deliver superior products at competitive prices, making us a preferred partner for clients across the globe.

At JND Hydraulics, we believe in continuous improvement and development. We invest heavily in technological advancements to ensure that we stay at the forefront of the industry. Our dedication to meeting the highest standards in product quality and customer service enables us to provide tailored solutions that meet the unique needs of our clients.

### Products

We offer a wide range of Single-Acting or Dual-Acting AC- and DC-powered Hydraulic Power packs to serve your hydraulic needs. Some of applications used for our AC-powered Hydraulic Power packs include vehicle lifts such as 2 post or 4 post lifts, scissor lifts, and wheel alignment scissor lifts. Our industrial applications can be found in dock levelers, elevators, table lifts, parking systems, recycling can press, and shop equipment. Our DC Power packs can be used as hydraulic power solutions for wing body trucks, man lifts, truck tail lifts, dump trucks, machinery, and material handling equipment, such as stackers, pallet trucks, and telescopic conveyor belts.

## HANSOL BEARING CO., LTD

### Introduction

Hansol Bearing Co., Ltd is a company that specializes in export/import as well as retail/wholesale of automobile bearing products. We have developed our own brand called "HSC BRG" upon which we sell TENSIONER, IDLER, PULLEY, CLUTCH RELEASE BEARINGS, WATER-PUMP, WHEEL HUB BEARINGS, and WHEEL HUB UNITS for Automobiles. We are exerting our utmost effort on manufacturing the best bearing in the world through our ceaseless research and development. We have also been exporting our products throughout the world, including the Middle East, Russia, and South America by availing our widespread sales network.

We, Hansol Bearing Co., Ltd will continue to develop top-quality products that are cost-effective, and implement a customer satisfaction sales strategy through a seamless after-sale service[A/S] system.

Finally, we promise to provide high-quality products to our customers through endless research and development. With customer satisfaction as our motto, Hansol Bearing will always take one more step forward to the future.

### Products

1. **Hub Wheel Bearing:** As an essential bearing, It is applied at automobile hub(wheel) and transmitting driving force to the wheel.
2. **Tensioner & Idler:** As an essential bearing, it is connected to the timing belt of automobile, to adjust the chain or belt's tension and balance
3. **Cluth Release:** As a device that is connected to the clutch disk cover of automobiles, it transfers the driving force during transmission change.
4. **Water Pump:** It aims to circulate coolant to cool down the heat from an automobile engine and plays a role in sending coolant to a cylinder block and water jacket in a cylinder head and in sending the heated coolant to a radiator to radiate heat, thus repeating the identical circulation.
5. **Air Con Bearing:** It includes a pulley to control an A/C belt and a compressor bearing applied to a compressor pulley to adjust tension and balance.

## GENON ELECTRIC INC

### Introduction

GENON which develops advanced and inventive automotive products focused on advanced power conversion systems and next generation sensors. A class-leading engineering expertise with talented and highly-skilled engineers who have 30 or more years experience in automotive fields.

### Products

Regulators are categorized into the 12V system and 24V system depending on the capacity of the generator and their use. Each system is categorized into Mono Function and Multi Function. Genon manufactures both of the 12V and 24V systems. Considering customer needs and the characteristics of products, the company uses both IC and ASVR to manufacture a variety of product families. Genon Automotive Electronics Co., Ltd produces all voltage regulators of 12V and 24V, and produces various shape's product groups like a Multi Type which applied the Mono Type, IC and ASVR reflecting a client's requirement and product feature.

Korea Trade-Investment  
Promotion Agency

Korea Trade-Investment Promotion Agency (KOTRA) was established in 1962 as a national trade promotion agency. Since then, KOTRA has contributed to the rapid growth of the export-led Korean economy,

by providing trade promotion activities such as market research, business matchmaking, overseas investment support, and etc. to small and medium sized enterprises of Korea.

Today, KOTRA has 129 branches in 85 countries, the largest organization of its kind.

- Provide all types of foreign investment support in Korea
- Provides information on trade, exhibitions and investment
- Provides administrative support for foreign investors
- Performs business matchmaking between foreign buyers and Korean businesses
- Supports business partnerships between global enterprises and outstanding Korean SMEs
- Supports the overseas work of Korean businesses

Korea Automotive Industry  
Globalization Foundation

Since our establishment in 2000, we have been supporting the globalization and overseas expansion of small and medium-sized businesses.

Our main business includes hosting a Korean exhibition called KOAA-GTT SHOW, and participating in the Korean pavilion at overseas exhibitions, holding on/off-line business meetings, dispatching overseas market development teams, discovering buyers, and various overseas marketing-related projects.

Our main customers include local governments, associations related to overseas marketing support for small and medium-sized businesses, and individual companies.

We are always one step ahead of our customers and do our best to help them reduce unnecessary steps, time, and costs.

Currently, we have 26 overseas networks (bases) in 19 countries on 7 continents, and we utilize this network to support and act as an agent for various overseas marketing projects of our small and medium-sized businesses, and are developing new businesses with constant innovation and a changing attitude.

We will continue to listen carefully to our customers' opinions and reflect them in our business to ensure customer satisfaction in all of our businesses.

## KIC CO., LTD

### Introduction

Since its establishment in Korea in 1998, KIC has specialized in producing Shock Absorber of Automotive and exporting it to more than 30 countries in Global After markets. We have the system that is able to design, produce, and export products to your country directly. And we have kept the good reputation in the global market with the high quality such a long time. In particular, it is recognized for low defect rate and durability in any road conditions. KIC is competing with KYB and MANDO in current markets. If you are looking for better price and good quality product, we will be your answer.

### Products

We are producing not only models of Korean cars but also Japan, USA and some European models. We can supply any models that buyers request within 3 months after review. Our goal is to make the best products that customers want using best parts of Shock Absorber in the market. This is also our commitment to our customers.

**BIOLIGHT CO., LTD****Introduction**

BIOLIGHT CO., LTD is established in 1993.

We are specialized in Automotive bulb. We are located in Gimcheon City in Korea.

Our main market is Europe and Middle East. Since its establishment, we've learned from the common truth : "A rolling wheel won't fall" We continue to challenge the automotive lighting industry.

Customer satisfaction has been realized with higher quality products, It has gained recognition for its trust and reputation in the global market.

BIOLIGHT CO., LTD is to assist all drivers in comfortable driving on the road to challenge ceaselessly research and development of car lighting systems.

**Products****Halogen BULB**

Halogen bulb is a tungsten bulb that uses chemical reactions of halogen material by sealing inert gas containing trace amounts of halogen substance. It is used by many common vehicles.

**HID BULB**

High Intensity Discharge (HID) bulbs, unlike normal light bulbs and halogen bulbs that emit light using filaments, do not have filaments, but are mixed with xenon gas and metal halide salts in a thin capsule.

**LED BULB**

Initially, it was mainly applied to brake bulbs and interior lighting due to low light levels, but due to the development of LED light sources, high-light LED was developed and used as headlamps for high-light and headlights.

**SMG****Introduction**

"Our Gears Move the World"

Since we started with a small-scale toll process in 1987, grew as a company manufacturing gear assemblies. Now, SMG manufactures gears that do not generate noise and vibration at high RPM with professional gear design, various cutting works, and grinding works by using CNC grinding machines.

Our company manufactures precision and durable gears for automobile Axle Gear boxes, and in particular, we have recently been developing and manufacturing precision gear parts for EV reducers. Moreover, small LOTS of commercial vehicles and special vehicles also can be produced, and recently, various prototype gearbox products have been researched and developed for Electric Vehicles. SMG opened a Precision Gear R&D for developing new items and localizing other imported goods to manufacture high-quality products that had been import-dependent.

**Products****ARS GEAR BOX :**

In turning the vehicle it is to reduce and suppress the Rolling using Actuator.

**LSD GEAR PARTS :**

LSD is a type of differential that allows its two output shafts to rotate at different speeds but limits the maximum difference between the two shafts.

**AXLE GEAR PARTS :**

Mass production of 4 types of parts used in Axle-Diff, HSG, Shaft, Gear, Clutch collar.

**AUTOMOTIVE GEAR :**

Special heat treatment for strengthening durability and precision grinding for contact improvement.

**EXOLUBE.CO., LTD****Introduction**

EXOLUBE is a leading company that has been manufacturing and blending lubricants for passenger cars, commercial vehicles and motorcycles, industrial oils and greases in South Korea. EXOLUBE, we pride ourselves in providing our customers with premium service together with technologically advanced products which allow us to be competitive and successful in global markets. EXOLUBE's adaptation strategy which offers customization of our products to the various market needs and requirements is providing to be our competitive advantage. The global lubricants market is continuously changing and we are mindful that our customers require flexibility to remain competitive. We also support our network with various sales tools to keep them abreast of product developments and product information. EXOLUBE's goal is growing as a major player in the global lubricants industry and penetrating new markets through qualified distributors.

**Products**

**1. X-OIL GALACTIC MOLY-X ACEA C2-16 API SP 0W-30**  
EXOLUBE X-OIL GALACTIC MOLY-X is formulated with high concentration of top grade PAO GROUP4 base oil, new generation anti-wearing AN GROUP5 base oil. It includes ORGANO MOLY-X and the latest high quality grade additives. It is TOP-TEER LONG-LIFE engine oil formulated to meet the demands and fuel efficiency expectations of the latest gasoline and diesel engines.

**2. X-OIL EURO ST ACEA C5-16 API SP 0W-20**  
EXOLUBE X-OIL EURO ST is formulated with new generation anti-wearing AN GROUP5 base oil and VHVI GROUP3 base oil. It includes the latest high quality grade additives. EURO ST engine oil is formulated to meet the demands and fuel efficiency expectations of the latest gasoline and diesel engines.

**3. X-OIL ULTRA XQ 5W-40**  
ULTRA XQ 5W-40 is a fully synthetic engine oil specially developed to meet stringent emission regulations for the latest European passenger car engines equipped with gasoline/diesel direct injection coupled with or without a turbo charger, after-treatment device. X-OIL ULTRA XQ meets and exceeds all major OEM requirements for their latest engines.

**SANYANG RUBBER****Introduction****\*\*ABOUT US\*\***

Founded in 1980, Sanyang Rubber has established itself as a leading name in the automotive parts industry. Our dedication to quality and precision drives us to design, manufacture, and supply a diverse range of components that adhere to the highest standards of performance and durability.

Our product lineup features essential parts such as steering dust covers and O-rings, tailored to meet the demanding needs of the automotive sector. We proudly serve numerous major automotive manufacturers in Korea, commanding approximately 70% of the domestic market.

**\*\*WHY US\*\***

- **Price**
  - We strategically bulk purchase raw materials and maintain price competitiveness by leveraging a stable supply of FMB and Seal/Support Rings from our sister company.
- **Special Tech**
  - Our R&D team is dedicated to continuously exploring new technologies and materials, bringing you the latest advancements in automotive parts.
- **Quality**
  - We implement rigorous quality control procedures, including the use of our advanced VISION inspection machine, to ensure zero defects.
- **Supply**
  - We use the Auto JIT system for product supply to achieve continuous manufacturing excellence

**Products****\*\* INTRODUCTION OF PRODUCTS\*\***

Ball joints, Tie rod ends, Stabilizer links, and other components used in suspension and steering systems are filled with grease, and the boot prevents oil leakage while protecting against external elements. We have developed a specialized system for producing these boots.

**BRTECH****Introduction**

BRTECH introduction

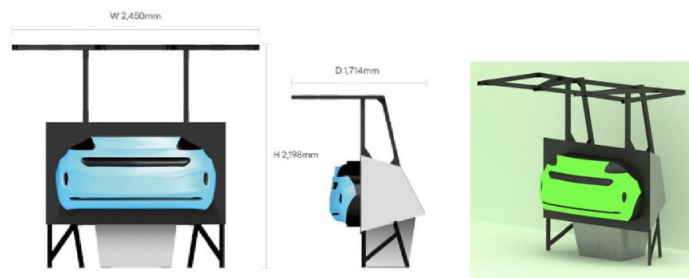

BRTECH is a company that aims to contribute to human society by providing advanced eco-friendly solutions and to establish a sustainable society virtuous cycle.

We established 2017 and started producing paint simulator [E-CO Painter] 2021. Now we try to develop the analysis machine of spraying and collaborative robot about automotive refinish painting.

**Products**

Paint Simulator [E-CO PAINTER] provides economic benefits to clients (e.g., painting-related companies, educational/research institutions) by eliminating volatile organic compounds(VOCs) and reducing costs caused by using costly paints and operating painting booths.

Our main targets with simulator will be global paint manufacturers and companies in various industries such as automobiles, shipbuilding, aviation and machinery. It is noteworthy that XR technology is proliferating worldwide and its utilization in education. Since the Europe has a high burden on the cost of eco-friendly paints due to constantly strengthening environmental regulations, it is an ideal target market for us to expand the business and suggest solutions to the problem.

**SIS CORPORATION****Introduction**

SIS CORPORATION is first of company had supplied Tailor Welded Blank Production line in Korea. Our Excellent performance machine are recognized by most of reputed customers like POSCO, HYSCO, HYUNDAI, GM, RENAUTSAMSUNG are using our machine.

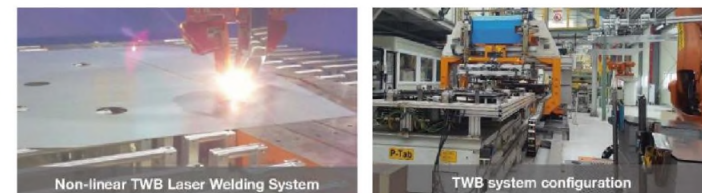

Beyond machine manufacturer, we are also supplying customers TWB product of diverse auto parts through huge experience as TWB production line manufacturer.

We have various patents and technologies in TWB production and We have high capability's TWB production line with Quality management system.

We promise you to supply high quality TWB material of defect free on time

**Products**

TWB (Tailor Welded Blank), HFTWB (Hot Formed Tailor Welded Blank) Product technology Tailored welded blank (TWB) is a material for press forming obtained by welding two or more steel sheets and tailored to a specific requirement like greater strength, better corrosion resistance, etc. By using a TWB, it is possible to modify the properties of parts of the blank, improve the yield and reduce the number of parts. Hot Formed Tailor Welded Blank(HFTWB) is to add Hot stamping process which heat steel panel after TWB process. Advanced this technology has advantage for improved safety and low weight than previous TWB blanks. We have many primary technology and patent for above processing technology based on experience of manufacturer of TWB laser welding line and Laser Ablation line. And It can make High quality and high productivity TWB production. Many reputed company use our TWB blank and HFTWB blank providing service stably with reasonable servicing cost.

taeokim94@gmail.com**KOREA BTS****Introduction**

Formed in 2018, Korea BTS is a leading LFP battery solutions company that develops and supplies specialized battery solution products and B2B battery solutions based on the technology and business of REVO, which carried out the LFP battery business for the first time in Korea. With technology accumulated over 10 years, we have established a technologically specialized product lineup. Based on products for camping cars and golf carts, we succeeded in developing a mobility solution product that led to the development of battery packs for electric vehicles, battery solutions for solar ESS and UPS, and automotive starter / black box auxiliary batteries.

**Products**

KOREA BTS Co., Ltd. specializes in high-tech LFP battery systems, power modules, and electric vehicle conversion modules, with a focus on large-scale applications and innovative Re-USE battery systems. Our goal is to become a global specialist company through "K-BTS: KOCHI" branded product exports and building a global network.

- Mobility Battery – 12.8V / 25.6V / 38.4V / 51.2V / 76.8V  
product development optimized for industrial equipment [campers, boats, cleaning vehicles]  
– KC Certification and CE Certification  
– Top product in each field with the highest domestic market share
- ESS / UPS Battery – 48V / 60V / 72V Module : Rack system  
48V ~ 960V, NCM/LFP optimized for industrial equipment  
– Supplying products ranging from kWh to MWh through modular rack system configuration  
– GUI / EMS Solution, DR(Demand Response) operation solutions are provided

**HANGUK MOLD CO., LTD****Introduction**

With the business philosophy "Ambition for the future innovation and emphasis on human being and promise". We, HANGUK MOLD Corporation, are doing our best to develop technology and satisfy customers. Our main products are diverse, ranging from complicated and high precise parts to large ones for automobile interior and exterior use. Furthermore, we have utilized CAD/CAM/CAE systems to attain high quality and well-timed delivery. Always looking forward to our customer's constant support and interest, HANGUK MOLD staff will be a valuable partner for our customers.

**Products**

- 1) Plastic injection Mold for automotive interior & exterior parts  
– Mold for Bumper, Instrument panel, Door trim, Console etc...
- 2) Aftermarket part  
– Side step, Closs bar, Skid plate etc
- 3) SMC Mold and parts
