SAN FRANCISCO--(BUSINESS WIRE)--The Japan External Trade Organization (JETRO) has announced that they are welcoming 105 Japanese startups to the 2024 cohort of the Global Startup Acceleration Program (GSAP). This program was founded in 2020 by JETRO, the Government of Japan's Cabinet Office, and the Ministry of Economy, Trade and Industry (METI), with the intention of supporting the overseas expansion of Japanese startups. With the addition of these 105 startups, the total number of startups participating in GSAP has officially exceeded 500 companies.

In this program, JETRO collaborates with multiple world-renowned accelerators with extensive, proven track records of unicorn creation, designing different specialized courses with those accelerators, and sorting participating startups into one of six unique courses depending on their field/industry or stage of development.

JETRO has collaborated with world-renowned accelerators [AlchemistX](#) and [Berkeley SkyDeck](#) for GSAP over the last four years. This year for the first time, JETRO is also partnering with [StartX](#) - the startup accelerator, fellowship, and community for Stanford students, founders, and alumni. They will also be joined by Michigan-based [Industry 4.0 Accelerator](#) and Silicon Valley-based [Ensanté](#). JETRO is also launching four new courses, including a 6-month long-term program aimed at helping established former GSAP startups gain further traction in the U.S. market.

The four newly established courses are:

- **B2B Commercial Traction Course** – aimed at achieving concrete results and closing deals for companies ready to enter the U.S. market; conducted by *AlchemistX*
- **AI/Sustainability Course** – conducted with *StartX*; leveraging the expertise and resources available in the *StartX* community
- **BioTech/MedTech Course** – conducted by *Ensanté*; hosted at UC Berkeley and QB3's *BakarLabs* incubator
- **Manufacturing Tech Course** – conducted by Michigan-based accelerator *Industry 4.0*

In addition to these four new courses, JETRO will also offer the **B2B Market Discovery Course** and **Deep Tech Course** again this year. The B2B Market Discovery Course will once again be led by *AlchemistX*, while the Deep Tech Course will again be organized by Berkeley SkyDeck.

The program will be conducted in a hybrid format (online and on-site) through March 2025. Participation is free. The program will feature business and strategy lectures, face-to-face bootcamps, interviews with potential business partners and investors, 1-on-1 mentoring, on-site programs, and demo days. Some courses will also have startups participate in overseas exhibitions, providing them with an opportunity to build a stronger network and connect with overseas investors.
