Hi [REDACTED],

I hope you are doing well. I'm reaching out ahead of CES to offer an interview with Su Le, Chief Digital and Strategy Officer of [TONOMUS](#) – the company responsible for developing the technology to power the world's first cognitive community at NEOM. This new cognitive city being built near the Red Sea represents one of the largest and most ambitious tech projects in the world.

As the leader of transformation and digital strategy across TONOMUS business units, Su has been closely involved in key achievements toward delivering the technological underpinning of NEOM. In the last year, TONOMUS has rolled out 300km of fiber, established up to 200 5G cell sites, and has unveiled a \$500 million data center, Zeropoint DC, to deliver the computing capacity for what is one of the most ambitious projects in the world.

Su will be attending CES from January 5-8 and would love to discuss how TONOMUS is harnessing the power of cognitive technology to build a resilient, interconnected, and intelligent ecosystem that could reimagine the way we live. He can also share more insight on momentum gained this past year and exciting projects ahead in 2023.

Please find Su's full bio attached and let me know if you have any questions or would be interested in speaking with Su at CES, and I would be glad to connect you.

Kindest regards,

[REDACTED]

[REDACTED]

Senior Vice President
