Hi [Name],

Following his speech at MoCA today, where COP28 President-Designate Dr. Sultan Al Jaber, outlined his priority agenda for COP28, this is his letter spelling out the details of his plan that has been sent to Parties to the United Nations Framework Convention on Climate Change, for your reference.

Many thanks,

Hi [Name],

This morning the COP28 Presidency released an ambitious, inclusive plan to fast-track the energy transition and supercharge climate finance.

Speaking at the Ministerial on Climate Action in Brussels, which brings together the environment ministers of the European Union, Canada, and China, COP28 President-Designate, Dr. Sultan Al Jaber, called on governments, industry, and all stakeholders to “disrupt business as usual” and take decisive action to tackle the climate crisis. He outlined a wide-ranging plan for COP28 focused on four key pillars - fast-tracking energy transition, fixing climate finance, focusing on adaptation and making COP fully inclusive.

The plan triples renewable energy capacity, doubles energy efficiency and doubles low-carbon hydrogen production by 2030. Dr. Al Jaber also highlighted the inevitability and reiterated calls for the essential phase down of fossil fuels and for climate finance to be “transformed, not reformed”, with a special focus on de-risking climate investments in the Global South.

Further details in the attached press release. I’ll be in touch again separately re: scheduling the meeting for next week!

Many thanks,
