2-Day Countdown to the Main Conference: Empowering a Sustainable Future with Green Finance

	<p>"Hong Kong's net zero commitments have opened up remarkable opportunities for technology in areas like climate, ESG and sustainable investment. The city's emergence as Asia's green finance hub showcases its innovative spirit and commitment to driving change, in which we at MioTech are delighted to play a part."</p> <p>Jason Tu, Founder and CEO at MioTech</p>
--	---

Another aspect in which the future of finance being redefined in Hong Kong is in sustainability. Green is a global agenda, and the past year's extreme weather events serve as a reminder of the urgent need to reduce carbon emissions and achieve sustainable development worldwide. Hong Kong is fully committed to this mission, aiming to reduce carbon emissions by 50% before 2035 and achieve carbon neutrality by 2050. This commitment has opened up significant opportunities for Fintech in areas such as ESG, insurance, and the provision of green finance.

Hong Kong is already a leading player in green finance, making substantial progress towards its targets. It has emerged as Asia's green finance hub, with the total amount of green and sustainable debt arranged or issued in the city exceeding US\$80 billion last year. The financial services offered by Hong Kong have attracted countries from ASEAN, the Middle East, and countries along the Belt and Road, who seek to utilize them for their own green transitions.

In February of this year, Hong Kong conducted an innovative experiment by introducing the world's first government tokenized green bond, utilizing blockchain technology to streamline the settlement process.

Additionally, the launch of Core Climate, the international carbon market under the Hong Kong Stock Exchange, has provided a platform for trading voluntary carbon credits in Hong Kong dollars and Renminbi.

To further accelerate the development of green technology, Hong Kong is actively attracting leading enterprises and cutting-edge technologies to establish themselves in the city. The establishment of the Office for Attracting Strategic Enterprises and the Northern Metropolis initiative are key drivers of this effort. So far, Hong Kong has successfully attracted approximately 30 strategic enterprises, with an initial investment of around HK\$30 billion and the creation of about 10,000 jobs.

Hong Kong's strategic positioning enables it to seize the opportunities presented by the global green transition. The city's initiatives in green finance and green technology, coupled with its unwavering commitment to ambitious targets, demonstrate its dedication to building a sustainable future. Through collaborations, Hong Kong fosters knowledge sharing, innovation, and the creation of a vibrant ecosystem for green tech and green finance.

Do not miss **Day 2 (November 3)** of the **Center Stage at 9:50 am**, featuring fireside chats with **Mr Joseph Chan, Under Secretary for Financial Services and the Treasury of Hong Kong SAR** and **Dr Xiao Feng, Chairman of Wanxiang Blockchain and HashKey Group** to get all the latest updates on the developments in green finance and green tech to digital assets and web3.

Join us at the Hong Kong Fintech Week on November 2-3 for the Main Conference at the Hong Kong Convention and Exhibition Centre in Wan Chai.

Check out the latest [speakers list](#) and [agenda](#) to plan your attendance.
