[Thematic Days Calendar - FINAL.pdf](#)

Hello,

The COP30 Presidency has unveiled the official **Thematic Days calendar** for this year's UN Climate Change Conference in Belém, Brazil.

The Thematic Days will unfold as follows:

- **November 10–11** will highlight themes of **Adaptation, Cities, Infrastructure, Water, Waste, Local Governments, Bioeconomy, Circular Economy, and Tourism**, laying the foundation for climate readiness and resilience across systems, sectors, communities, and regions.
- **November 12–13: Health, Jobs, Education, Culture, Justice and human rights, Information integrity, and Workers.** These days also introduce the **Global Ethical Stocktake**, reinforcing equity and moral responsibility in climate governance.
- **November 14–15** zoom in on systems transformation across **Energy, Industry, Transport, Trade, Finance, Carbon markets, and Non-CO₂ gases**, supporting the global push to **triple renewable energy, double energy efficiency, and transition away from fossil fuels** in a just, orderly, and equitable manner.
- **November 17–18** elevate both planetary and community stewardship — centering on **Forests, Oceans, and Biodiversity**, while spotlighting **Indigenous peoples, Local and traditional communities, Children and Youth, and Small and medium entrepreneurs**, showcasing inclusive, grounded, and nature-aligned solutions.
- **November 19–20** tackle food, farming, and equity at their roots, addressing **Agriculture, Food systems and food security, Fisheries, and Family farming**, while also emphasizing leadership from **Women and gender groups and Afrodescendants**. Additionally, the last thematic days will focus on **Science, Technology, and Artificial intelligence**, underscoring their pivotal role in driving innovation, governance, and digital equity as critical enablers for global climate solutions.

Both the press release and the Thematic Days calendar are attached.

Thank you,

PRESS RELEASE

COP30 Announces Ambitious Thematic Days, Invites the World to Belém

Brasília, Brazil, August 5, 2025 — The Brazilian Presidency of COP30 has unveiled the official Thematic Days calendar for the upcoming UN Climate Change Conference, to be held in Belém, Pará, from November 10 to 21, 2025. Designed as a catalyst for implementation and inclusion, the program spans more than 30 interconnected themes and offers a clear entry point for global actors to contribute to real-world climate solutions.

Designed with intention to address the outcomes of the first Global Stocktake, each day invites collaboration across borders and sectors, transforming the COP from a negotiation forum into a global platform for delivery, innovation, and partnership. Programming will take place across both the Blue and Green Zones.

“These Thematic Days represent a bold invitation to the world, to come together in Belém and help shape the future. Each day is intended to connect negotiations with real-world impact, offering a platform where implementation, equity, and urgency meet. COP30 is where lived experience must translate into urgent climate action”, said Ambassador André Corrêa do Lago, COP30 President-Designate.

Each Thematic Day has been crafted to align with COP30’s six Action Agenda axes — **Energy, Industry & Transport; Forests, Oceans & Biodiversity; Agriculture & Food Systems; Cities, Infrastructure & Water; Human and Social Development; and Cross-cutting issues** — and to highlight priority actions and solutions outlined in the COP30 Presidency’s 30 Key Objectives for implementation.

The Thematic Days will unfold as follows:

- **November 10–11** will highlight themes of **Adaptation, Cities, Infrastructure, Water, Waste, Local Governments, Bioeconomy, Circular Economy, and Tourism**, laying the foundation for climate readiness and resilience across systems, sectors, communities, and regions.
- **November 12–13: Health, Jobs, Education, Culture, Justice and human rights, Information integrity, and Workers.** These days also introduce the **Global Ethical Stocktake**, reinforcing equity and moral responsibility in climate governance.
- **November 14–15** zoom in on systems transformation across **Energy, Industry, Transport, Trade, Finance, Carbon markets, and Non-CO₂ gases**, supporting the global push to **triple renewable energy, double energy efficiency, and transition away from fossil fuels** in a just, orderly, and equitable manner.

- **November 17–18** elevate both planetary and community stewardship — centering on **Forests, Oceans, and Biodiversity**, while spotlighting **Indigenous peoples, Local and traditional communities, Children and Youth, and Small and medium entrepreneurs**, showcasing inclusive, grounded, and nature-aligned solutions.
- **November 19–20** tackle food, farming, and equity at their roots, addressing **Agriculture, Food systems and food security, Fisheries, and Family farming**, while also emphasizing leadership from **Women and gender groups** and **Afrodescendants**. Additionally, the last thematic days will focus on **Science, Technology, and Artificial intelligence**, underscoring their pivotal role in driving innovation, governance, and digital equity as critical enablers for global climate solutions.

“We want people from every walk of life, scientists and students, ministers and mayors, activists and artists, to see where they belong in this agenda and plan to join us in Belém to take collective action,” said Ana Toni, CEO of COP30. “This calendar brings clarity to participants, and momentum to our movement. Participation is power and everyone is invited to be part of this Global Mutirão.”

Participants from governments, civil society, academia, business, and philanthropy are encouraged to use this agenda to plan their presence in Belém, ensuring active engagement during the most relevant days for their work and constituencies. The thematic days will also assist CEOs, ministers, and other leaders in organizing events and coordinating their stay in Belém.

Daily programming will include high-level dialogues, side events, cultural programming, and implementation showcases, spotlighting diverse climate leadership and tangible progress around the world.
