Solution Dialogues: Tropical Forest Forever Facility (TFFF)

Tropical forests are vital for sustaining life on Earth. To conserve them in the face of mounting threats, they must become worth more standing than destroyed.

The **Tropical Forest Forever Facility (TFFF)** is an innovative financial mechanism to ensure **permanent, large-scale financing** for the conservation of tropical forests.

Designed by the Government of Brazil with 10 other partner countries, and after broad consultations with Indigenous Peoples, local communities, civil society, and the private sector, the Facility aims to:

- Establish a **USD 125 billion permanent endowment** to reward countries that conserve forests.
- Leverage public funds to mobilize private capital.
- Distribute annual results-based payments to tropical forest countries.

The **Solution Dialogues: Tropical Forest Forever Facility** is a high-level event to present this Global South-led initiative. The event will feature remarks by **President Luiz Inácio Lula da Silva**, alongside other heads of state and international leaders, highlighting TFFF's potential to **reshape global climate finance** through equitable, performance-based funding.

The latest version of the [TFFF Concept Note](#) was released in August. The event will be **open to the press** and broadcast live on the [UN Webcast website](#).
