#### Overview

COP30 is about people - and urgent action to improve lives. In Belém, at the heart of the Amazon, we will unite the world to reinforce global cooperation, connect climate action to real lives, and accelerate the implementation of the Paris Agreement. Guided by our four pillars - Leaders' Summit, Action Agenda, Negotiations, and Mobilization - we will turn ambition into implementation. This is our moment to choose change over catastrophe, to act together rather than react in isolation. The lands of the Amazon and leadership of Indigenous peoples and traditional communities are vital to solving the climate crisis, and hosting COP30 here underscores their global significance. We invite not only nations, but also leaders, businesses, communities, and subnational governments, among others, to join us in Belém with shared purpose in a Global Mutirão to address the climate crisis by scaling solutions that prioritize people and, together, create a safer, more prosperous future for all.

### COP30 Final Recap: COP30 Delivers a New Era of Accelerated Implementation

As negotiations continues, COP30

Thematic Agenda closes today having demonstrated that the world is moving from ambition to action. Over the last two weeks, Belém has served as a global stage for accelerated delivery, scaling solutions, renewing trust in multilateralism, and centering climate action on people's daily lives.

From the rapid operationalization of the Fund for Responding to Loss and Damage to advances in adaptation, forest finance, food systems, and the Global Mutirão, COP30 showed the increasing shift from negotiation to implementation.

Indigenous-led adaptation, the Belém Health Action Plan, youth, workers, and mayoral leadership underscored how climate solutions are grounded in lived realities.

#### Action Agenda

The COP30 Presidency and Climate Champions advanced progress across all six axes and 30 key objectives. The Global Climate Action Outcomes Report, published today, provides a comprehensive look into the breadth and depth of work across the Action Agenda to accelerate implementation. A new Five-Year Vision for Global Climate Action streamlined 480+ initiatives into 117 Plans to Accelerate Solutions (PAS) aligned with the First Global Stocktake.

Axis – Transitioning Energy, Industry & Transport

Partners advanced a \$1T investment plan to triple renewable capacity by 2030

Axis – Stewarding Forests, Oceans & Biodiversity

Countries delivered early on the \$1.7B land-tenure pledge, renewed with \$1.5–2B, and advanced protection across 160M hectares, with 20% of funds flowing directly to Indigenous Peoples and local communities.

Axis – Transforming Agriculture & Food Systems

Over \$9B mobilized for regenerative landscapes, reaching 12M farmers and restoring 210M hectares.

Axis – Cities, Infrastructure & Water

Cities and regions cut 850,000 tonnes of CO<sub>2</sub> in 2024; new finance platforms aim to reach 200 cities by 2028.

Axis – Human & Social Development

The Belém Health Action Plan launched with \$300M committed. Race to Resilience

initiatives now benefit 437.7M people worldwide.

Axis  – Enablers & Accelerators

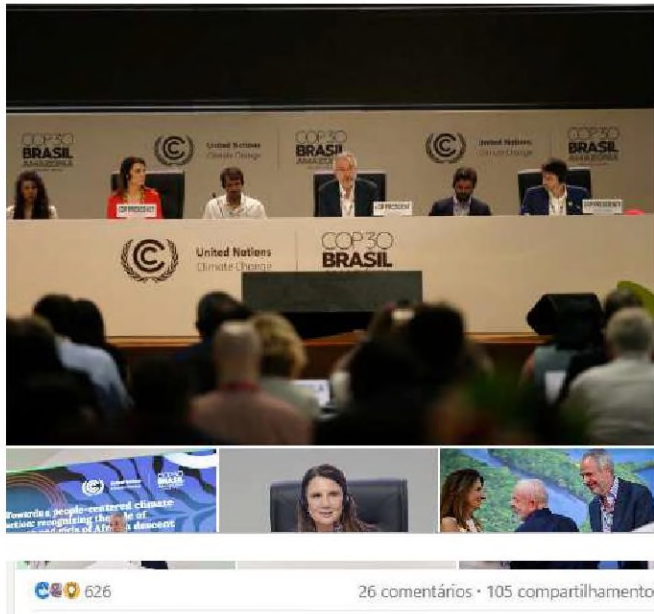

FINI partners announced \$1T in investible adaptation pipelines by 2028, including \$500M from multilateral agencies and philanthropies.

 Global Mobilization

- The Global Mutirão brought people-centered vision to life, with the Global Ethical Stocktake Report launched and the Beat the Heat Drive advancing solutions to protect 3.5B people.
- Indigenous and traditional communities shared adaptation and renewable-energy strategies rooted in ancestral knowledge.
- The Youth-Led Climate Forum united young leaders from 100+ countries, presenting calls for equity, climate finance, and community-led resilience.

COP30 showed what is possible when governments, cities, investors, Indigenous Peoples, youth, and civil society move together in the spirit of the #GlobalMutirão.

We are grateful for their commitment, which helped us deliver a COP centered on implementation, inclusion, and cooperation. This COP was shaped by the spirit of the Global Mutirão: solutions over promises, courage over inertia.

Our partners embodied that spirit by supporting the platforms, spaces, and exchange that enable us to pursue the three main goals of this COP: strengthening multilateralism, accelerating the implementation of the Paris Agreement, and connecting the climate regime to people's daily lives.

Our mission continues.

COP30 Day 11: From Pledges to Progress, Accelerating Action

Day 11, the final thematic day of COP30, captures the breadth and depth of work done over the last two weeks to accelerate progress and drive implementation. Today's events continue to spotlight advances across agriculture, food systems, gender equality, and sustainable tourism, underscoring how collaboration and inclusive leadership are translating ambition into concrete outcomes.

Today also marks Brazil's National Day of Black Consciousness, honoring the resistance, cultural legacy, and leadership of Afro-descendant peoples, whose contributions continue to shape the country's history and social fabric.

As negotiations intensify, actors from across sectors highlight the tangible results emerging from the Action Agenda and the Global Mutirão, showing how intersectional perspectives and community-driven initiatives are powering implementation.

Throughout the day, leaders, youth, Indigenous Peoples, Afro-descendant communities, and civil society deepen dialogue around climate solutions and reaffirm the global commitment to a just transition and a resilient, equitable, and sustainable future for all.

Towards a People-Centered Climate Action: Recognizing the Role of Women and Girls of African Descent – spotlighting leadership that confronts climate vulnerability rooted in racism and historical inequalities, and advancing solidarity among Afro-descendant, Indigenous, and local community women and girls.

✔ Dialogues for Race-Sensitive Climate Solutions, Ethnic-Racial Equality, and their Intersectionalities: a workshop led by Brazil's Special Envoys to align race-sensitive climate action with human rights, the SDGs, the COP30 Action Agenda, and guidance from the Durban Conference.

✔ Global Mutirão: A Lasting Legacy, showcasing community-based initiatives that regenerate ecosystems and strengthen local adaptation across territories and biomes.

✔ Indigenous Peoples and Local Communities: the Heart of Global Climate Action – advancing justice, equity, and political recognition for traditional communities, with discussions on international cooperation, loss and damage, territorial protection, and non-economic losses such as knowledge, cultural practices, and Indigenous languages.

As COP30 moves forward, Day 11 reinforces a clear message: climate action must uplift people, protect rights, and value the ancestral and community knowledge that sustains our ecosystems and strengthens global resilience.

### COP30 Day 10 Recap: Fueling the Future Food System

Day 10 at COP30 spotlighted agriculture and food systems, showing how restoring land, strengthening family farming, elevating women's leadership, and scaling science-based solutions are shaping a more resilient future.

Across the Action Agenda and Global Mobilization, leaders advanced agroecology, regenerative production, and climate-resilient agri-food systems as critical drivers of the transition.

A major milestone was the launch of the RAIZ Accelerator, a legacy effort to restore degraded farmland by mobilizing private capital and applying advanced mapping tools to scale nature-positive production. New Plans to Accelerate Solutions (PAS) including for TERRA for family farming, the aquatic food systems and algae aquaculture - reinforced the central role of Indigenous Peoples, local communities, SMEs, and women in building a climate-smart food future.

Breakthroughs on fertiliser decarbonization, including the Belém Declaration on Fertilisers, showed how clear standards and innovative advancements can cut emissions while boosting yields.

The Action Agenda High-Level Event celebrated the delivery of 117 PAS, demonstrating how a redefined Action Agenda has become a global engine for collective implementation aligned with the First Global Stocktake.

Across Global Mobilization, communities and young leaders emphasized the human dimension of food systems transformation. Mutirão in the Territories highlighted community-driven adaptation rooted in agroecology and territorial governance, while Latin American youth called for renewed multilateralism grounded in justice and shared responsibility.

✔ Launch of RAIZ Initiative

Ten countries endorsed RAIZ to restore degraded farmland and mobilize private capital with FAO support.

✔ Global Climate Action Agenda Showcases Implementation Results

High-Level Event celebrated success of redefined Action Agenda, including 117 PAS aligned with the First Global Stocktake.

✔ Family Farming at the Center of Climate Solutions

TERRA positions family farmers, Indigenous Peoples, and traditional communities as drivers of agroecology and sustainable value chains.

✔ Aquatic Food Systems

Two PAS advance algae aquaculture and climate-resilient aquatic foods, unlocking finance for SMEs, women, and youth.

✔ Expanding Global Leadership on Food Systems Transformation

Three new members joined the ACF, strengthening coordination across ten initiatives.

✔ COP30 Gender Day

Brazil launched a protocol promoting women's leadership in climate emergencies.

✔ Reducing Emissions from Fertilizers

The Belém Declaration and PAS introduced standards, demand mechanisms, and digital tools for low-emission fertilizers.

✔ Global Mobilization

Mutirão in the Territories showcased community-led climate solutions; youth dialogues emphasized equity; Indigenous and traditional communities highlighted renewable energy and adaptation grounded in ancestral knowledge.
