

PRESS RELEASE

SDRPY Opens Office in Al-Jawf Province of Yemen

Al Hazm, Yemen / 24 June 2019 - The Saudi Development and Reconstruction Program for Yemen (SDRPY) has announced the opening of its office in Al-Jawf Governorate and the start of full-scale field monitoring in the province to identify needs for priority development projects. Mr. Ali Aldosari has been appointed office director.

“The program is keen to implement sustainable development projects,” said Saudi Ambassador to Yemen and SDRPY Supervisor Mohammed bin Saeed Al Jaber. “These projects heighten the impact of our positive contributions to Yemeni society.”

Al Jaber added that the projects and initiatives the program is carrying out in Yemen’s various governorates have taken into account the best practices applied to such work in the Kingdom of Saudi Arabia. SDRPY is contracting with consulting companies specialized in the fields of construction and supply of machinery and equipment, which the program is providing in support of Saudi Arabia’s brothers and sisters in Yemen.

For his part, SDRPY Al-Jawf Office Director Ali Aldosari said that field research carried out by the program’s personnel in the governorate included visits to the directorates of Al Hazm and Khabb wa ash Sha’af, and specifically the villages of Alyetmah, Alashah and Almarazeeq. Appropriate studies and needs assessments have been conducted in preparation for implementation of projects in the region.

PRESS RELEASE

SDRPY Water Initiative to Benefit 300,000 in Al-Jawf Province of Yemen

Al-Jawf, Yemen / 25 June 2019 – On Tuesday, at a ceremony in Yemen’s Al-Jawf Governorate attended by Al-Jawf Governor Amin Al-Akimi, leaders of the Coalition to Restore Legitimacy in Yemen, and local government authorities, the Saudi Development and Reconstruction Program for Yemen (SDRPY) launched an initiative to expand access to clean water, donating a fleet of drinking-water tankers for an estimated 300,000 beneficiaries in the province.

In a speech on behalf of the Supervisor-General of SDRPY and Saudi Ambassador to Yemen Mohammed bin Saeed Al Jaber, SDRPY Al-Jawf Office Director Ali Aldosari said:

“This is one of several vital development initiatives SDRPY has launched in different sectors in coordination with legitimate government and local authorities,” Aldosari said. “We intend for these projects to create direct and indirect employment opportunities and help improve services and living standards.”

Aldosari pointed out that SDRPY engineering teams had toured the region, conducted needs assessments, and prioritized projects for electricity, water, roads, healthcare, education and agriculture. The SDRPY projects implemented in various Yemeni provinces should have a significant impact on development nationwide, he added, extending real support to economic and social development, reflected by increased stability and security.

“The Kingdom of Saudi Arabia continues to work with the legitimate government to restore hope and security through development and reconstruction,” noted Aldosari during his speech. “The peoples of our two countries, the Kingdom and the brotherly Republic of Yemen, are deeply entwined in the history of the Arab world.”

In addition to today’s donation of ten 5,000-liter drinking-water tankers in Al-Jawf, SDRPY is working to support the water sector in Yemen through several other projects, including the drilling of wells in Marib, Al-Mahra, Socotra and Hajjah provinces, in addition to establishing water pipelines to the district of Al-Ghaydah and developing a water distribution network within the city. SDRPY is also establishing a solar-powered water purification plant on the Red Sea island of Fasht in Hajjah Governorate and has supplied a fleet of water tankers to Hajjah province as well.
