

Hello ,

I am writing to gauge your interest in an on the record interview with the Pakistan's Federal Minister for Climate Change and Environmental Coordination Musadik Masood Malik.

As I am sure you have seen, Pakistan has experienced massive flooding in the Punjab region, displacing more than 200,000 people and killing upwards of 850. This is a humanitarian crisis as well as a environmental crisis. Here is a [link](#) to the most up-to-date coverage of the floods.

This latest climate event is just one in a series of worsening natural disasters affecting one of the most climate vulnerable countries in the world. Minister Musadik Malik will be available to comment on Pakistan's unique environmental challenges and how his country is working to address them.

Please let us know if you are interested in meeting with him.

Best regards,

Alex
