

Welcome Speech at the 2025 BIO China Global Forum

1:00~1:10pm, 15th June 2025

DoubleTree Suites by Hilton Boston-Cambridge

Dear guests, colleagues, ladies and gentlemen,

Good afternoon!

It is a great honor to join you today at this significant gathering of global innovators and visionaries in biotechnology. As we stand at the intersection of scientific advancement and global health challenges, the BIO China Global Forum serves as a premier platform for experts, enterprises, and institutions to share insights, forge partnerships, and pursue solutions to the challenges we face together.

I would like to take this moment to introduce the essential role of the China Council for the Promotion of International Trade (CCPIT for short). As China's largest trade-, investment- and industry- promotion agency, over the recent years, CCPIT has hosted high-profile delegations for their China visits, including the U.S. Chamber of Commerce, the USCBC and well-known American CEOs, and supported U.S. companies in China with our services such as exhibitions, mediation, arbitration, and IPR

protection. The CCPIT U.S. Representative Office, established in 1988, has expanded its circle of friends, carried out a series of trade and investment promotion activities, and witnessed the friendly exchanges of the two business communities.

Among these efforts, we are also pleased to highlight the 3rd China International Supply Chain Expo(CISCE for short)-the world's first exhibition with the theme of supply chain, which will be held from 16th to 20th July in Beijing. The 3rd CISCE covers 6 key industrial chains and 1 exhibition area including the Healthy Life Chain. This chain focuses on health sciences and green technology. US companies still remain very active this year. GE Healthcare again, and Medtronic and Bidy Healthcare, and other global industrial leaders have confirmed their presence this year.

I believe the CISCE and the BIO China Global Forum reflect a shared vision. BIO China global partners are more than welcome to leverage the CISCE, and let us take full advantage of this opportunity to share expertise, build trust, and advance cooperation for a healthier, more sustainable, and more connected world.

Thank you, and I wish the Forum every success.
