

Attributable to an NSO spokesperson:

“As we have said to the media repeatedly, we can categorically deny that our technology was used in the murder of Jamal Khashoggi. NSO has an obligation to investigate any misuse of our products, which are operated exclusively by our verified government customers. As such, we do not have access to targets or any data collected. In the case of Jamal Khashoggi, we carried out a thorough investigation into these unfounded allegations, which we made public given the nature of this extraordinary case. We checked with every government that NSO does business with around the world and none were using NSO technology to track Jamal Khashoggi.”
