Hon. Seck: We hope this message finds you well and healthy.

In light of the recent military coup in Niger and the ongoing political crises across the Sahel and broader West African region, our team has compiled the following messaging document – meant for both domestic and international audiences – which we hope you can use in your public and private discussions going forward. Additionally, we have drafted corresponding tweets that we can coordinate with Richard to post via your personal account if you agree.

We look forward to speaking with you soon and to continuing our work with you -- and your campaign -- in the lead up to next February's consequential election.

Kindest regards,  
Jeff
