Friday, February 18	10:00:00 AM	Posted	GLOBAL	FEED	<p>Etruscans established the earliest urban civilization in the Mediterranean in central Italy in the 7th century BC. At its peak, their civilization covered a territory stretching to northern and southern Italy. Rome absorbed Etruria starting from the 3rd Century BC, but remnants of Etruscan culture survive in two necropolises: Cerveteri and Tarquinia. These large cemeteries reflect nine centuries of burial practices, provide a peek into what Etruscan cities looked like, and boast monumental tombs, wall carvings, and incredibly well-preserved paintings.</p> <p>Cerveteri: The tombs at Cerveteri are organized in a city-like plan with features representative of Etruscan urban planning, with paved roads, gutters, and sidewalks. Though many necropolises in central Italy were reserved for lavish burials for the area's elite, Cerveteri also holds tombs for the middle-class.</p> <p>Tarquinia: Near the coast of the Tyrrhenian Sea, Tarquinia contains nearly all surviving Etruscan paintings—almost 200 are preserved within the town's 6,000 tombs. These paintings, which often featured banquets and dancing, are a window into how Etruscans lived—and celebrated!</p> <p>The Etruscan Necropolises of Cerveteri and Tarquinia became a @UNESCOWorldheritage site in 2004, protecting their displays of creative genius and preserving the remnants of a lost civilization.</p> <p>: Franz Marc-Frei/The Image Bank/Getty Images; imageBROKER/Peter Seyffert/Getty Images; Sir Francis Canker Photography/Moment/Getty Images; Smartshots International/Moment/Getty Images</p> <p>#unescoworldheritage #Italy #UNESCO #Italia #Cerveteri #Tarquinia #necropolis #explore #beautiful #travel #likeItaly #love #CentralItaly #textiles #Etruria #Etruscan</p>	Feed 1-4

Friday, February 18	12:00:00 PM	Posted	SOCIAL	FEED	<p>Italy is an #EternalInnovator and the impressive legacy of Italian groundbreaking inventions proves this claim to be true! Due to the tremendous amount of history that is linked to Italy, it is no surprise that various things used today across the globe were #InventedInItaly! Here are a few that revolutionized architecture, music, and adventure:</p> <p>The original Vertical Forest created by Stefano Boeri in recent years stands in Milan, Italy. It represents a unique collaboration between sustainability, housing, wildlife and foliage!</p> <p>The fortepiano revolutionized the music industry upon its creation in 1698 by Bartolomeo Cristofori!</p> <p>Have you ever used a parachute? Well the design for the modern parachute can be attributed to none other than Leonardo Da Vinci!</p> <p>Meet Ascoli Piceno—the central Italian town that looks like a fairytale, but is all too real!</p>	Vertical Forest, pianoforte, parachute
Saturday, February 19	12:00:00 PM	Posted	SOCIAL	FEED	<p>This luminous Italian town is largely built with a special type of local rock called travertine. In the daytime, Italian travertine shimmers in the sunlight. At night, it appears to glow in the moonlight and illuminates the town in a whole new way.</p> <p>Read more about this mystical town via @CNN https://www.cnn.com/travel/article/ascoli-piceno-marche-italy-travertine/index.html</p>	link auto-populates
