Learn how Huawei's Traffic Intelligent Twins make urban transportation safer while yielding new levels of energy efficiency. [tinyurl.com/rp6qpu3](https://tinyurl.com/rp6qpu3)

Features

- Traffic Prediction**  
Real-time prediction of vehicle and pedestrian flows in urban traffic environments with the traffic intelligent twins system.
- Traffic Light Optimization**  
Integration of multiple data sources (e.g., traffic light conditions, traffic volume, etc.) to optimize traffic light conditions for urban traffic environments, resulting in more efficient traffic light control systems.
- Road Network Analysis**  
Real-time analysis of road network and traffic flow to identify congestion points and optimize traffic flow.
- Accident Monitoring and Control**  
Real-time monitoring of road conditions and traffic flow to identify potential accident hotspots and optimize traffic flow to prevent accidents.
- Traffic Parameter Assessment**  
Real-time assessment of traffic parameters (e.g., traffic volume, speed, etc.) to optimize traffic flow and improve road safety.
