**E2E Self-Service Boarding Approved by Face ID**

The diagram illustrates an end-to-end self-service boarding process powered by Face ID. At the center is a 'Video Cloud' hub. This hub is connected to several key components and processes:

- Software-Defined Camera**: A central component at the top, connected to multiple camera feeds.
- Baggage Drop-off**: A process where passengers drop their luggage.
- Airport Security Check**: A process where passengers pass through security.
- Post-Queueing**: A process where passengers wait for boarding.
- Self-Check-in**: A process where passengers check in for their flight.
- Police Face DB** and **Airport Face DB**: Databases for facial recognition, connected to the Video Cloud.
- Flight System**: The central system for flight operations, connected to the Video Cloud.
