Gaps still exist in cybersecurity, and women should be empowered to fill them. More via: jieyiaves.tinyurl.com/jacter12c

There are gaps in cybersecurity, but I'll also say there are AI development and aspects like blockchain as well. You’ve got that lack of representation, of diversity of backgrounds and my concern is those gaps are going to get bigger if we don’t address that now.

When looking for the best laptops on the market, the MateBook can’t be overlooked. Here’s why.

The MateBook X: Huawei’s stunning notebook is not to be overlooked. Huawei’s 2020 MateBook X is as good looking as it is powerful, making for a winning ultrabook.

38 SeedsForTheFuture participants from the 2020 Colombia + Trinidad and Tobago program came together virtually to share about their cultures. Technology can show local customs and beautiful landscapes, even when they can’t be accessed in person.

The engine is no longer the brain of your car, technology is! Check out how Huawei’s HiCar solution can detect road conditions, improve driver safety and make transportation a connected experience. tinyurl.com/y5cvew2o

Thank You!

A car driven by a connected driver.
We'd like to spotlight @debraruh for all her amazing work to drive conversations and change around disability inclusion. Thank you for engaging with the community on such an important issue.

Did you hear? MobileSyrup praised the Huawei FreeBuds Pro for its top-of-the-line noise-cancellation, premium design and sound quality.

She can't see with her eyes, but she can with her hearing. Here's how Jamallah captures her best photos with AI. #SeasonOfGiving

Story time should be a joyous part of everyone’s childhood. How does the StorySign app utilize AI to help deaf children read, so they don’t miss out on the fun? Read to find out & download the app: https://tinyurl.com/yx93ogkg #InternationalDayOfPersonsWithDisabilities

Your car is so much more than a form of transportation. With Huawei’s HiCar solution, drivers can use voice commands and smart devices to control the many aspects of the vehicle. Check out how. #techexplained
How can tech help those with disabilities overcome obstacles in daily life? Read about the Trouble-free hearing app and how it enables users to communicate & access information so they can live fuller lives: https://tinyurl.com/yyvz5fw

International Day of Persons with Disabilities

Disabilities Aren't Always Visible
Building a more inclusive, accessible and sustainable world

On #NationalDisabilityDay, we thank people like Debra Ruh who are bringing awareness to the challenges that people with disabilities face every day. Technology is a means of empowerment that allows everyone to have equal access to opportunities. #TECH4ALL
