Couldn’t agree more. Beyond investing in digital learning, working on the accessibility/affordability of devices & network connectivity is key too. A very clear gap has emerged in continuity of education between lower & higher income communities, which tend to be more connected.

António Guterres @antonioguterres - Aug 1
We are in the middle of an education crisis. 150 million students are still affected by school closures due to COVID-19 and 25 million may never return.

An effective pandemic recovery requires investment in teachers, digital learning, and systems fit for the future.
