MORE OF THIS: In Hungary, Orban declares victory over George Soros.
abouthungary.hu/blog/europe-ha...

The decision of the European Council last week was an open declaration of opposition to György Soros' attempt to take power. Political issues cannot be linked to financial issues, subjective criteria cannot be the basis for financial decisions, and the legal procedure laid down in the Treaty of the European Union cannot be circumvented Soros-style. The European Union has maintained its unity and won. George Soros lost. It would be time for Europeans to finally send him home to America. There is no explanation as to why we Europeans tolerate an American speculator building and buying an EU system of influence with American money. Until European leaders take this last step, we will have to face attempts by him and his people to seize power over and over again. The migration and gender action plans from the Soros workshop are already on the table. It's high time to put an end to George Soros' European joy ride.
