Promote

INSANE: 34 MILLION MIGRANTS, according to European Commission’s Migration Action Plan—which is unsurprisingly similar to Soros’ own plan for Europe.

Hungary, said Prime Minister Orbán, “opposes it with all its might.” abouthungary.hu/blog/european-...

If you are thinking that all of this sounds familiar, you’re not alone. The Action Plan looks similar to George Soros’ plan to have Europe admit “at least a million asylum-seekers annually for the foreseeable future.” The financial speculator has been for years promoting his ideas of an “open society” to change Europe and European society. Those migrants that Europe should be admitting, according to the Soros plan, their distribution should be permanent and mandatory. He also made it clear that his plan aims to protect immigrants and that national borders are an obstacle to this.

But the Commission’s Action Plan goes even further, seeking to bring in some 34 million migrants to become EU citizens (nearly 8 percent of the current EU population). That is, 34 million migrants would be granted citizenship and the right to vote.

Could be the final straw for the breakup of the EU?
