

Delegation of German Industry and Commerce in Washington, DC

  Join us next Wednesday, December 10 for the Transatlantic AI Forum  

We're excited to bring together experts from hyperscalers, policy, and research for a deep dive into one of today's biggest AI challenges: the skyrocketing demand for data center capacity.

As AI adoption accelerates across the U.S. and Europe, data centers have become the backbone of innovation, raising important questions about energy use, permitting, infrastructure planning, and cross-border collaboration.

The forum will:

- ◆ Share U.S. and European perspectives
- ◆ Highlight common challenges
- ◆ Explore opportunities for smarter, more sustainable cooperation

If you're working in AI, digital policy, or infrastructure, this is a conversation you won't want to miss.

 Wednesday, December 10 | 9am-1pm
