

Delegation of German Industry and Commerce in Washington, DC

47m •

Calling German Energy Companies 🇩🇪💡

DGIC is bringing together a high-level expert delegation for a closer look at one of the most pressing challenges shaping the digital economy: the growing demand for energy driven by data centers and AI.

Traveling to Northern Virginia and the San Francisco Bay Area, the delegation will explore how the U.S. is addressing rising electricity demand while strengthening grid capacity, energy supply, efficiency, resilience, and sustainability.

The program will bring together government representatives, utilities, data center operators, technology companies, industry associations, and research institutions through expert discussions, roundtables, and site visits.

The delegation will also provide an opportunity to exchange experiences and identify approaches that may offer valuable insights as Germany continues to expand its data center infrastructure.

The delegation is organized in cooperation with [GACC WEST – Representative of German Business](#) and [adelphi](#) as part of the German-American Energy Partnership.
