On 9/11 we watched in horror as thousands of Americans were murdered. That was made possible b/c sick terrorists committed to their warped version of Islam were given safe haven and the freedom to operate with impunity.

In Niger an attempted coup is taking place. If it succeeds, then another failed state will provide safe harbor to those who wish Americans harm. My friend and client, Niger's Ambassador to the United States Kiari Liman Tinguiri, spells out the danger clearly in an oped in today's Wall Street Journal.

If you read nothing else today, then please take a minute to read his words and enhance your understanding of why the situation in #niger could affect all of us.

I encourage you to watch this interview by Niger's Ambassador to the United States Dr. M. Kiari Liman-Tinguiri. He does an excellent job of outlining what's at stake, and what needs to happen to promptly and properly resolve the #nigercoup . #niger
