I hope this note finds you well. I work with Richard Attias, CEO of the FII Institute and think he would make an excellent addition to the sustainability / healthcare [REDACTED] discussion I understand your team is hosting during Climate Week.

Are you still considering speakers to participate in the conversation?

Richard's talent is anticipating and addressing the most pressing issues faced by the planet, activating powerful networks and inspiring innovation, establishing him as a trusted advisor to leaders the world over. He is focused on driving change by bridging gaps, creating a knowledge-based economy and ensuring economic diversification. Topics of interest include:

- How to best leverage new applications of technology, such as AI and robotics, research to improve health equity worldwide
- Opportunities to unlock greater innovation in sanitation infrastructure for global health, including through private-public partnerships
- Emerging diseases caused by climate change
- The need for policies that consider both human health and the wellbeing of the planet's animals and ecosystems

I'd be happy to coordinate next steps if this might be of interest.

Thanks,
