Hi [REDACTED],

Saw you have been covering some of the biggest trends and players shaping AI integration and investment – Would you be interested in a conversation with [Peter H. Diamandis](#), a member the [Future Investment Initiative \(FII\)](#) Board of Trustees and the founder and executive chairman of the XPRIZE Foundation about how we can ensure that AI does not exacerbate the digital divide?

AI—and making sure it has a net positive impact on humanity—was a central theme of FII-8, which just took place in Riyadh, Saudi Arabia. Global leaders from finance, business, and politics gathered to discuss the biggest issues facing citizens across the world and drive impactful investment. This year’s conference saw \$70 billion in Deals announced by those in attendance.

Peter would be happy to discuss what this means for the positive application of AI, especially in developing countries. He’d also be happy to expand on key discussion points from FII-8, including:

1. Why countries that have higher levels of tech adoption, including AI, have seen their GDP increase vs. those who haven’t adopted these technologies.
2. The importance of global private-public partnerships in developing AI infrastructure.
3. Why and how education curriculums need to change to reflect advances in AI and set students up for success.

For additional background, I’ve included Peter’s full bio below. Would you be interested in connecting? Let me know and I can coordinate.

Thanks,
[REDACTED]

+++

Recently named by Fortune as one of the “World’s 50 Greatest Leaders,” **Peter H. Diamandis** is the founder and executive chairman of the XPRIZE Foundation, which leads the world in designing and operating large-scale incentive competitions. He is also the executive founder of Singularity University, a graduate-level Silicon Valley institution that counsels the world’s leaders on exponentially growing technologies.

As an entrepreneur, Diamandis has started over 20 companies in the areas of longevity, space, venture capital and education. He is cofounder of BOLD Capital Partners, a venture fund with \$250M investing in exponential technologies, and co-founder and Vice Chairman of Celularity, Inc., a cellular therapeutics company.

Diamandis is a New York Times Bestselling author of two books: *Abundance – The Future Is Better Than You Think* and *BOLD – How to go Big, Create Wealth & Impact the World*. His newest book in this series of exponential technologies — *The Future is Faster Than You Think* — released on January 28, 2020.

He earned degrees in molecular genetics and aerospace engineering from the MIT and holds an M.D. from Harvard Medical School.

Diamandis’ favorite saying is “the best way to predict the future is to create it yourself.”

Global leaders from finance, business, and politics gathered to discuss the biggest issues facing citizens across the world and drive impactful investment. This year’s conference saw \$70 billion in Deals announced by those in attendance.

Peter would be happy to discuss what this means for the positive application of AI, especially in developing countries. He’d also be happy to expand on key discussion points from FII-8, including:

1. Why countries that have higher levels of tech adoption, including AI, have seen their GDP increase vs. those who haven’t adopted these technologies.
2. The importance of global private-public partnerships in developing AI infrastructure.
3. Why and how education curriculums need to change to reflect advances in AI and set students up for success.

For additional background, I’ve included Peter’s full bio below. Would you be interested in connecting? Let me know and I can coordinate.

Thanks,
[REDACTED]

Recently named by Fortune as one of the “World’s 50 Greatest Leaders,” **Peter H. Diamandis** is the founder and executive chairman of the XPRIZE Foundation, which leads the world in designing and operating large-scale incentive competitions. He is also the executive founder of Singularity University, a graduate-level Silicon Valley institution that counsels the world’s leaders on exponentially growing technologies.

As an entrepreneur, Diamandis has started over 20 companies in the areas of longevity, space, venture capital and education. He is cofounder of BOLD Capital Partners, a venture fund with \$250M investing in exponential technologies, and co-founder and Vice Chairman of Celularity, Inc., a cellular therapeutics company.

Diamandis is a New York Times Bestselling author of two books: *Abundance – The Future Is Better Than You Think* and *BOLD – How to go Big, Create Wealth & Impact the World*. His newest book in this series of exponential technologies — *The Future is Faster Than You Think* — released on January 28, 2020.

He earned degrees in molecular genetics and aerospace engineering from the MIT and holds an M.D. from Harvard Medical School.

Diamandis’ favorite saying is “the best way to predict the future is to create it yourself.”

Subject: [EXTERNAL] Conversation with Senator Matteo Renzi on why emerging markets are a focus of global investors?
Date: Tuesday, November 12, 2024 1:02:30 PM
Attachments: [image001.png](#)

Hi [REDACTED],

Would you be interested in a conversation with [Senator Matteo Renzi](#), former Prime Minister of Italy and member of the [Future Investment Initiative \(FII\) Board of Trustees](#), about the trends driving private investment in emerging markets, which was a defining topic of last week's FII-8 Conference in Riyadh, Saudi Arabia?

Increasingly, emerging markets are attracting global private capital – which is supporting growth and development in these regions. As discussed at FII-8 – which saw global leaders from finance, business, and politics gather to discuss the biggest issues facing citizens across the world and drive impactful investment – there are certain characteristics which are making some emerging markets particularly attractive. These include:

1. A rich talent pool and a strong commercial history.
2. Stable macroeconomic conditions.
3. Hard infrastructure (physical) and soft infrastructure (capital markets) to support commerce.
4. Pro-growth regulatory environments, fostering constructive dialogue between government, businesses, and entrepreneurs.
5. A maturing exit landscape, driven by public market liquidity, domestic investor support, and alignment with global standards.

Matteo can elaborate on these drivers of inward investment, including what less developed markets can learn from them and how we can leverage these insights to unlock even more inward investment into emerging markets and assets.

For additional background, I've included Matteo's full bio below. Do let me know if a conversation is of interest and I will set up a time.

Thanks,

[REDACTED]

+++

Matteo Renzi has been the Senator of the electoral college of Florence since 2018. In his political experience he has served as Prime Minister of Italy from February 2014 to December 2016 and as Mayor of Florence from June 2009 to February 2014. He was the youngest prime minister in the history of the Italian Republic.

With his government's economic policies, Italy has gone from -1.7% of GDP to + 1.6%. His "JobsAct"

bill created 1.2 million new jobs. Foreign investment, the export of Italian products, tourism, the trust of consumers and companies all grew during his government, as had not happened since Italy's adoption of the Euro. Renzi led the European council with the Italian presidency in the second half of 2014. He participated in numerous international meetings including three editions of the G20 (Australia, Turkey, China) and three editions of the G7. He signed the Paris agreement on environmental sustainability and climate change. He tackled the migration crisis as Prime Minister by proposing the Migration Compact in Europe and the Sophia operation named after the little girl saved at sea by Italian volunteers. He signed the law on the recognition of civil unions, multiplied state investments against poverty by 100, led the only Italian government with gender equality between women and men.

Renzi is the author of numerous publications and of a television series on the cultural, financial and artistic beauty of Florence aired in 2018-2019 on the Discovery platform. Renzi graduated in law from the University of Florence. Since 2017 he has taught a course at Stanford University at their Florence headquarters entitled "The challenges of Europe". He is a member of a number of advisory boards. He was a leader of the Italian catholic scout. He is married to Agnese and has three children.

2. Stable macroeconomic conditions.
3. Hard infrastructure (physical) and soft infrastructure (capital markets) to support commerce.
4. Pro-growth regulatory environments, fostering constructive dialogue between government, businesses, and entrepreneurs.
5. A maturing exit landscape, driven by public market liquidity, domestic investor support, and alignment with global standards.

Matteo can elaborate on these drivers of inward investment, including what less developed markets can learn from them and how we can leverage these insights to unlock even more inward investment into emerging markets and assets.

For additional background, I've included Matteo's full bio below. Do let me know if a conversation is of interest and I will set up a time.

Thanks,

[REDACTED]

+++

Matteo Renzi has been the Senator of the electoral college of Florence since 2018. In his political experience he has served as Prime Minister of Italy from February 2014 to December 2016 and as Mayor of Florence from June 2009 to February 2014. He was the youngest prime minister in the history of the Italian Republic.

With his government's economic policies, Italy has gone from -1.7% of GDP to + 1.6%. His "JobsAct"

bill created 1.2 million new jobs. Foreign investment, the export of Italian products, tourism, the trust of consumers and companies all grew during his government, as had not happened since Italy's adoption of the Euro. Renzi led the European council with the Italian presidency in the second half of 2014. He participated in numerous international meetings including three editions of the G20 (Australia, Turkey, China) and three editions of the G7. He signed the Paris agreement on environmental sustainability and climate change. He tackled the migration crisis as Prime Minister by proposing the Migration Compact in Europe and the Sophia operation named after the little girl saved at sea by Italian volunteers. He signed the law on the recognition of civil unions, multiplied state investments against poverty by 100, led the only Italian government with gender equality between women and men.

Renzi is the author of numerous publications and of a television series on the cultural, financial and artistic beauty of Florence aired in 2018-2019 on the Discovery platform. Renzi graduated in law from the University of Florence. Since 2017 he has taught a course at Stanford University at their Florence headquarters entitled "The challenges of Europe". He is a member of a number of advisory boards. He was a leader of the Italian catholic scout. He is married to Agnese and has three children.

Hi [REDACTED],

Would you be interested in a conversation with [Senator Matteo Renzi](#), former Prime Minister of Italy and member of the [Future Investment Initiative \(FII\) Board of Trustees](#), about the trends driving private investment in emerging markets, which was a defining topic of last week's FII-8 Conference in Riyadh, Saudi Arabia?

Increasingly, emerging markets are attracting global private capital – which is supporting growth and development in these regions. As discussed at FII-8 – which saw global leaders from finance, business, and politics gather to discuss the biggest issues facing citizens across the world and drive impactful investment – there are certain characteristics which are making some emerging markets particularly attractive. These include:

1. A rich talent pool and a strong commercial history.
2. Stable macroeconomic conditions.
3. Hard infrastructure (physical) and soft infrastructure (capital markets) to support commerce.
4. Pro-growth regulatory environments, fostering constructive dialogue between government, businesses, and entrepreneurs.
5. A maturing exit landscape, driven by public market liquidity, domestic investor support, and alignment with global standards.

Matteo can elaborate on these drivers of inward investment, including what less developed markets can learn from them and how we can leverage these insights to unlock even more inward investment into emerging markets and assets.
