Definitely! Since Peter has been on before, would you be more interested in having a new guest? We also work with **Richard Attias from the [Future Investment Institute \(FII\)](#)** who has led the charge in convening global leaders for over 8 years at FII and can speak to a host of topics across AI / Robotics, climate / energy, education and healthcare investment on a global scale. He has a pretty strong convening power and has been involved in the development and production of more than 2000 events over the past 30 years, including World Economic Forum Annual Meeting at Davos, Clinton Global Initiative, Nobel Laureates Conferences, The New York Forum, The New York Forum AFRIC, UNESCO NGO Forum, One Planet Summit, Olympism In Action, Future Investment Initiative, Bloomberg New Economy Forum, The African Cup, The African Games, and multiple opening ceremonies.

Of course, we can chat through the specific topics he can speak to but one that might be of interest is the **investment case for industries concentrated in the Global South**, including Africa and developing South American countries, as the region is largely overlooked amidst global conflict (and political / economic turmoil). Richard believes that Western countries and the Middle East can harness private capital to support the global south and has some concrete ideas of how to put this in action.

Either way – would love to work with you on something either for Peter or Richard. Looking forward to your thoughts.

Thanks,

He's been on before and could do again. Would want to do a call with him to discuss topics that we haven't covered, what he's focused on etc. I know you might also have something to present on this -would want specifics :)

- The world is changed by your example. Not by your opinion.

Hi [Redacted] – Hope you are doing well since we last connected!

Was looking at your podcast and wanted to offer a potential guest who might be of interest. [Dr. Peter H. Diamandis, Founder of X-Prize Foundation](#) – a global non-profit organization that designs and hosts incentivized competitions for entrepreneurs and companies to develop groundbreaking technologies, and [Singularity University](#), a business incubator that counsels leaders on exponentially growing technologies. Peter is also a Board Member of [Future Investment Institute \(FII\)](#), the global thinktank and

nonprofit focused on creating a positive impact for humanity.

Peter has a particular focus on life longevity, **exploring some of the health technologies like AI, genomics, CRISPR, gene therapy, cellular medicine, and sensors that might be interesting to tackle on the podcast.** He can walk through how our specific technological advancements can slow, stop and possibly even reverse aging as we advance while diving into broadly how technology is a prominent driver for this new age of thinking about aging.

Having founded over 20 companies across longevity, space, venture capital and education, Peter is well positioned to discuss his outlook for emerging technologies and how global markets can prepare for AI integration. He also has experience [on stage](#) and [on podcasts](#) so is a well-versed recorded guest.

Let me know your thoughts here – happy to chat live if this might be of interest for the podcast or refine any topics based on what you have in the pipeline.

Thanks,
