Subject: RE: Re: [REDACTED] Summit - Prosek clients for earned consideration

Hi [REDACTED] – Thank you for considering one additional company here and apologies for my delay! We work with the FII Institute who has two great board members that would be a good fit for the event in June. They would be great as a fireside chat or on panels and could dive into several aspects of the AI revolution from regulation to new development and use cases. Let me know what you think as you consider!

Thanks,

[REDACTED]

+++

Richard Attias, Chairman of global thinktank [Future Investment Initiative Institute](#) (FII Institute) who would be a great speaker and brings a robust background and point of view on timely topics. You may have come across Richard: as well as his role at FII, he is the **founder and former CEO of Publicis Events Worldwide and former Executive Producer of Davos WEF** for over a decade. He’s an advisor to Heads of State, business executives and civic leaders looking to build influence and impact change.

Richard’s deep connections with investors, policymakers and business executives has allowed him to form in depth insights on the development of and investment in new technologies like AI and healthtech. Specifically, he could speak to:

- Using AI in developing countries, specifically in the global south to address the lack of healthcare professionals, educators and frontline workers
- How the fragmented regulatory environment had made AI integration challenging on a global scale and what the future intersection of policy and progress may look like

- The various cultural divides that put stress on universal technology, specifically in language-based AI programs

+++

[Dr. Peter H. Diamandis](#), **Founder of X-Prize Foundation** – a global non-profit organization that designs and hosts incentivized competitions for entrepreneurs and companies to develop groundbreaking technologies, and [Singularity University](#), a business incubator that counsels leaders on exponentially growing technologies. Peter is also a Board Member of [Future Investment Institute \(FII\)](#), the global thinktank and nonprofit focused on creating a positive impact for humanity.

Having founded over 20 companies across longevity, space, venture capital and education, Peter is well positioned to discuss his outlook for emerging technologies and how global markets can prepare for AI integration. For example, at XPRIZE/Singularity, he advises the world's top entrepreneurs and business leaders on how they can leverage these technologies to bring about breakthroughs for the benefit of the global community. This is particularly relevant in light of [growing concerns among global policy makers around AI regulation](#) and how to responsibly use this technology while not stifling progress. His focus areas include:

- Technological innovation in healthcare with a focus on longevity science
- The ethical concerns of AI and its rapid adoption
- Opportunity for continued investment in the AI/robotics sector

Hi [REDACTED],

[REDACTED] kindly resend the list for us to consider at our June Tech conference? Might be easier than digging through from [REDACTED]

Thanks for your interest.

[REDACTED] - Prosek clients for earned

Hi [REDACTED],

Hope you're doing well! [REDACTED] let me know that you're both programming the summer Summit and had sent over our word document of potential clients for earned opportunity speaking consideration.

I had sent over that list prior to [REDACTED] and just wanted to connect via email in case your team had any questions or feedback etc. Know it's early innings but let us know if there is any initial feedback.

Best,

[REDACTED]

Subject: Richard Attias for [REDACTED] Summit?

Hi [REDACTED] –

Reaching out as I know we're coordinating on a separate thread, but I also work with [Richard Attias](#), **Chairman of global thinktank [Future Investment Initiative Institute](#)** (FII Institute). He'd a great speaker given what I know about the events. You may have come across Richard: as well as his role at FII, he is the **founder and former CEO of Publicis Events Worldwide and former Executive Producer of Davos WEF** for over a decade. He's an advisor to Heads of State, business executives and civic leaders looking to build influence and effect change.

Richard is focused on driving change by bridging global gaps, creating a knowledge-based economy and ensuring economic diversification. Of late, his focus has been centered on **the gap between the Global North and the Global South and how targetted investment from northern economies across healthcare, climate, education and technology can support communities globally.**

Perspectives/discussion points include:

- Disappointing global satisfaction levels across global north and global south communities and how leaders can adapt economies and policies to support citizens basic needs
- Why AI regulation on an international level is crucial to ensuring the ethical application of the technology, especially with the emergence of DeepSeek
- The application of innovative technology to healthcare and life sciences system, and why it will disrupt traditional healthcare markets and result in positive change on a global scale

Are there any slots you are still looking to fill this year? Let me know, happy to discuss.

Best,

[REDACTED]
