Subject: Interview Opportunity: Richard Attias / FII's Vision for a Sustainable Future

Hi [REDACTED],

With the impacts of climate change continuing to intensify, and the environmental regulatory environment in flux right before Earth Day next week, wanted to offer a conversation with **Richard Attias, Chairman of the global think tank [Future Investment Initiative \(FII\) Institute](#)**, which is focused on identifying innovative solutions that blend ESG, entrepreneurship and emerging tech.

Under Richard's leadership, **FII has facilitated almost \$200bn in investments to address pressing global challenges including sustainability concerns** and he could discuss how facilitating these investments is more important now than ever to create a more sustainable world.

A few top-of-mind themes Richard can speak to include:

- The potential for digital transformation and AI adoption to power sustainable solutions for environmental challenges
- How climate technologies and startups can drive innovative solutions across food production, energy generation and waste disposal
- The investment opportunities for climate resilience in emerging markets, primarily in the global south

•

Would you be interested in connecting with Richard for a conversation around how collaboration between institutions, innovators, and investors can drive global sustainability solutions? Happy to coordinate.

Best,

[REDACTED]
