Subject: FII Institute Report: AI Impact on Jobs in College-Educated Workforce

Hi [redacted] – It's been a while since we last connected, hope you are doing well. Know you've shifted to the workplace beat so reaching out to share a report that might be of interest.

The Future Investment Initiative (FII) Institute and Columbia University today released a report that analyzes the impacts of AI on the job market – specifically for the entry level, college-educated workforce. **It further explores how AI is affecting wages, income distribution, and productivity, signaling a broader shift in the labor force amid rising economic anxiety.**

A couple of highlights from the report include:

- AI is shifting the functional income distribution for the college educated workforce from wages to a more capital-intensive framework – with US corporate profit rising and some reports noting a 6% increase on the average since the 2000s.
- Evidence shows an uptick in productivity without any reflection on real wage earning
- Anxieties are high among young people, with roughly 44% believing AI will take away more job opportunities than it creates
- Higher education institutions are taking note, with many launching AI-centered majors or general education requirements in AI skills

You can find the full report here– would this be something you are interested in covering? Happy to answer any questions or **connect you with the Chairman and Acting CEO of FII, Richard Attias to break this down**.

Best,

Subject: RE: Embargo Report: AI Impact on Entry Level Wages

Great, thank you for accepting the embargo! See attached for the full report. For ease of reference, there are a few key points outlined below:

- AI is shifting the functional income distribution for the college educated workforce from wages to a more capital-intensive framework, with US corporate profit rising, with some reports noting a 6% increase on the average since the 2000s.

- Evidence shows an uptick in productivity without any reflection in real wage earning
- Anxieties are high among young people, with roughly 44% believing AI will take away more job opportunities than it creates
- Higher education institutions are taking note, with many launching AI-centered majors or general education requirements in AI skills

Once you take a look, please let me know if this might be something you are interested in covering. If helpful to contextualize, happy to connect you with the Chairman and Acting CEO of FII, Richard Attias to break this down.

Looking forward to hearing from you.

Best,

Subject: [EXTERNAL] Embargo Report: AI Impact on Entry Level Wages

Hi [redacted] – Saw you are focused on have covered the job market, specifically look at Gen Z and Millennials and wanted to offer you, **under embargo**, an early look at a report from the

Future Investment Initiative (FII) Institute and Columbia University, which will be released tomorrow.

Broadly, the report details the impacts of AI on the job market, specifically for the entry level, college educated workforce, delving into the fallout from AI on wages, income distribution and productivity, signaling a shift in the labor force among rising economic anxieties.

The embargo is set to lift tomorrow, January 27, 2026. Would you like to view the report and do you agree to the embargo? If so, I can share the details.

Thanks,
[redacted]
