**Subject:** CEO of FII Institute on shifting investment in critical minerals

Hi [REDACTED],

Critical minerals are moving to the center of global investment conversations, particularly as demand accelerates across energy systems, aerospace, and advanced manufacturing.

One theme that came through clearly at FII Institute's recent [PRIORITY Miami](#) convening is that while the opportunity set continues to expand, capital is becoming far more selective about where it is deployed. In critical minerals specifically, investment is increasingly shaped by supply chain security, processing capacity, and geopolitical risk, not just resource availability.

I work with [Richard Attias](#), Chairman and acting CEO of the [Future Investment Initiative \(FII\) Institute](#), who convenes investors, operators, and policymakers across energy, critical minerals, and adjacent sectors. A core focus of his work is how long-term capital is being allocated as competition for strategic resources intensifies. He can speak to:

- Where capital is actively moving across critical minerals, and where investors are pulling back
- How processing, refining, and midstream constraints are shaping investment decisions
- The role of industrial policy and national security priorities in securing supply chains
- Why execution risk and infrastructure gaps are emerging as key differentiators in scaling projects

His background includes shaping platforms like Davos, Bloomberg New Economy Forum, and the Clinton Global Initiative, and he's spent decades working at the intersection of policy, capital, and global markets.

Would it be helpful to connect you with him for a quick conversation?

Best,

[REDACTED]

**Subject:** RE: [REDACTED] TV Interview Inquiry

Hi [REDACTED] – Jumping in here for the team. Unfortunately, [REDACTED] won't be able to make Saturday work but I might have another guest if helpful.

I work with Richard Attias, **Chairman of the Executive Committee and Acting CEO of the [Future Investment Initiative Institute \(FII\)](#)** who would be well suited to talk about the general economic environment against the current backdrop. In case you aren't familiar, Richard has led the charge in convening global leaders for over 9 years at FII, gathering global CEOs, business executives and policymakers to discuss the most pressing advancements around technology, education, healthcare and sustainability. President Trump even spoke at this year's FII Priority Miami Summit just last month.

Unlike many of his peers, Richard is someone who has occupied positions at the top of the corporate world and now as a global leader in the third sector, which he feels has given him a set of unique perspectives, including his steadfast belief in the need for the public sector to work in partnership with the private sector, especially now.

If you are open to it and Richard is available, we can coordinate a segment – just let me know! Regardless, it's great to be in touch and appreciate you reaching out.

Best,

[REDACTED]
