ADOMS BUSAN OFFICE

Change of flag to Antigua & Barbuda, handled in Busan.

The ADOMS Busan Office is the regional office of the Antigua & Barbuda Department of Marine Services and Merchant Shipping (ADOMS) for the Republic of Korea and Japan, operated by SolarisTech Inc.

A full service office for the flag: registration and change of flag, mortgages, certificates, seafarer documents, flag State inspections, ISM, ISPS and MLC audits and newbuilding work, all handled through Busan for owners and managers in Korea and Japan. ADOMS maintains regulatory oversight and flag State responsibility from its headquarters in Antigua & Barbuda, and registration of each vessel is subject to acceptance by the Administration.

The Antigua & Barbuda flag, from an office in Busan

In a change of flag, the new register has to open, the old one has to close, the mortgage has to follow, the crew's documents have to be in place and the certificates have to be aboard before she sails. The ADOMS Busan Office handles the Antigua & Barbuda side of each step for the Administration and works with the owner and the previous registry on the rest.

Registration and provisional registration

Mortgage registration

time and date of recording.

Crew documents

Endorsements, Seafarer's Books and other crew documents for owners, managers and manning agents across the region, handled in Busan.

Inspections and audits

Flag State inspections and ISM, ISPS and MLC audits are arranged through the ADOMS Busan Office around the vessel's trading pattern.

Why owners choose this flag

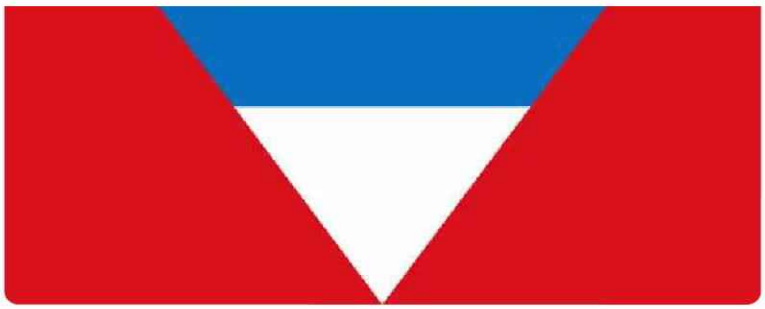

- ✓ Preferential rate for ship tonnage dues in Chinese ports, approximately 28 percent below the general rate, applying from 8 June 2024 to 7 June 2029.
- ✓ Paris MoU White List and Tokyo MoU High Performance List, the top tier of both regimes.
- ✓ All six MARPOL Annexes, the Ballast Water Management Convention and MLC 2006 in force.
- ✓ A published sanctions regime with deregistration powers.
- ✓ A register that has grown in gross tonnage and in number of ships in each of the last three years.

Paris MoU performance list valid to 6 July 2027. Tokyo MoU performance list valid to 30 June 2027. Tonnage dues: PRC Ministry of Finance Notice Cai Guan Shui [2024] No. 24. Register growth: UNCTADstat, merchant fleet by flag of registration, 1 January 2023 to 1 January 2026.

SOLARISTECH INC.

Tell us the vessel, her current flag and the date you need her on the new register, and the office will come back with the document list and an indicative timetable, which depends on the documents and on the Administration's acceptance.

MARITIME COMPLIANCE INTELLIGENCE

Compliance, Made

SolarisTech puts senior survey, audit and newbuilding judgment behind the Nautilux AI platform, so owners, charterers, underwriters and lenders can see what the record shows and act on it.

SOLARISTECH INC.

Built around the conventions and codes that matter: ISM ISPS MLC SOLAS MARPOL STCW

ONE PARTNER, THREE PILLARS

Intelligence, Training and Judgment,

Nautilux flags risk in your own record. SwiftAction assigns the course written for that deficiency code. Our founder attends when the job needs someone on board. Compliance becomes a system instead of a scramble before every inspection.

AI COMPLIANCE INTELLIGENCE

Nautilux AI™

Our compliance intelligence platform. Upload your certificates, records and photographs and Nautilux reviews the submission against ISM, ISPS, MLC, SOLAS and MARPOL, scores the risk and tracks corrective action to closure. Actions logged and time-stamped.

SOLARISTECH INC.

More than 600 courses for crew and shoreside teams, mapped to our compiled 627-code Port State Control deficiency set. No single MoU publishes a unified list, so we built one and wrote the training against it. When Nautilux records a finding, the matching course is the one written for that code.
